

THE ATWOOD

A second stage womens shelter

WHY A WOMEN'S SHELTER?

- Surge in domestic violence cases since Covid
- Only **one** dedicated Second Stage women's shelter in the downtown area - sleeps 108 (in DTES)
- On average, it takes a women **three attempts** to leave a DV situation, often the final straw is when it affects her **children**
- Housing crisis **disproportionally affects women** - makes it nearly impossible for low-income women to support their vulnerable family

PROJECT GOAL

To...

design a **trauma-informed** centre that embraces women and their children at the most vulnerable points in their life, one that offers **safety, community**, and provides a path to reintegration into society.

PROGRAM

STAFF:

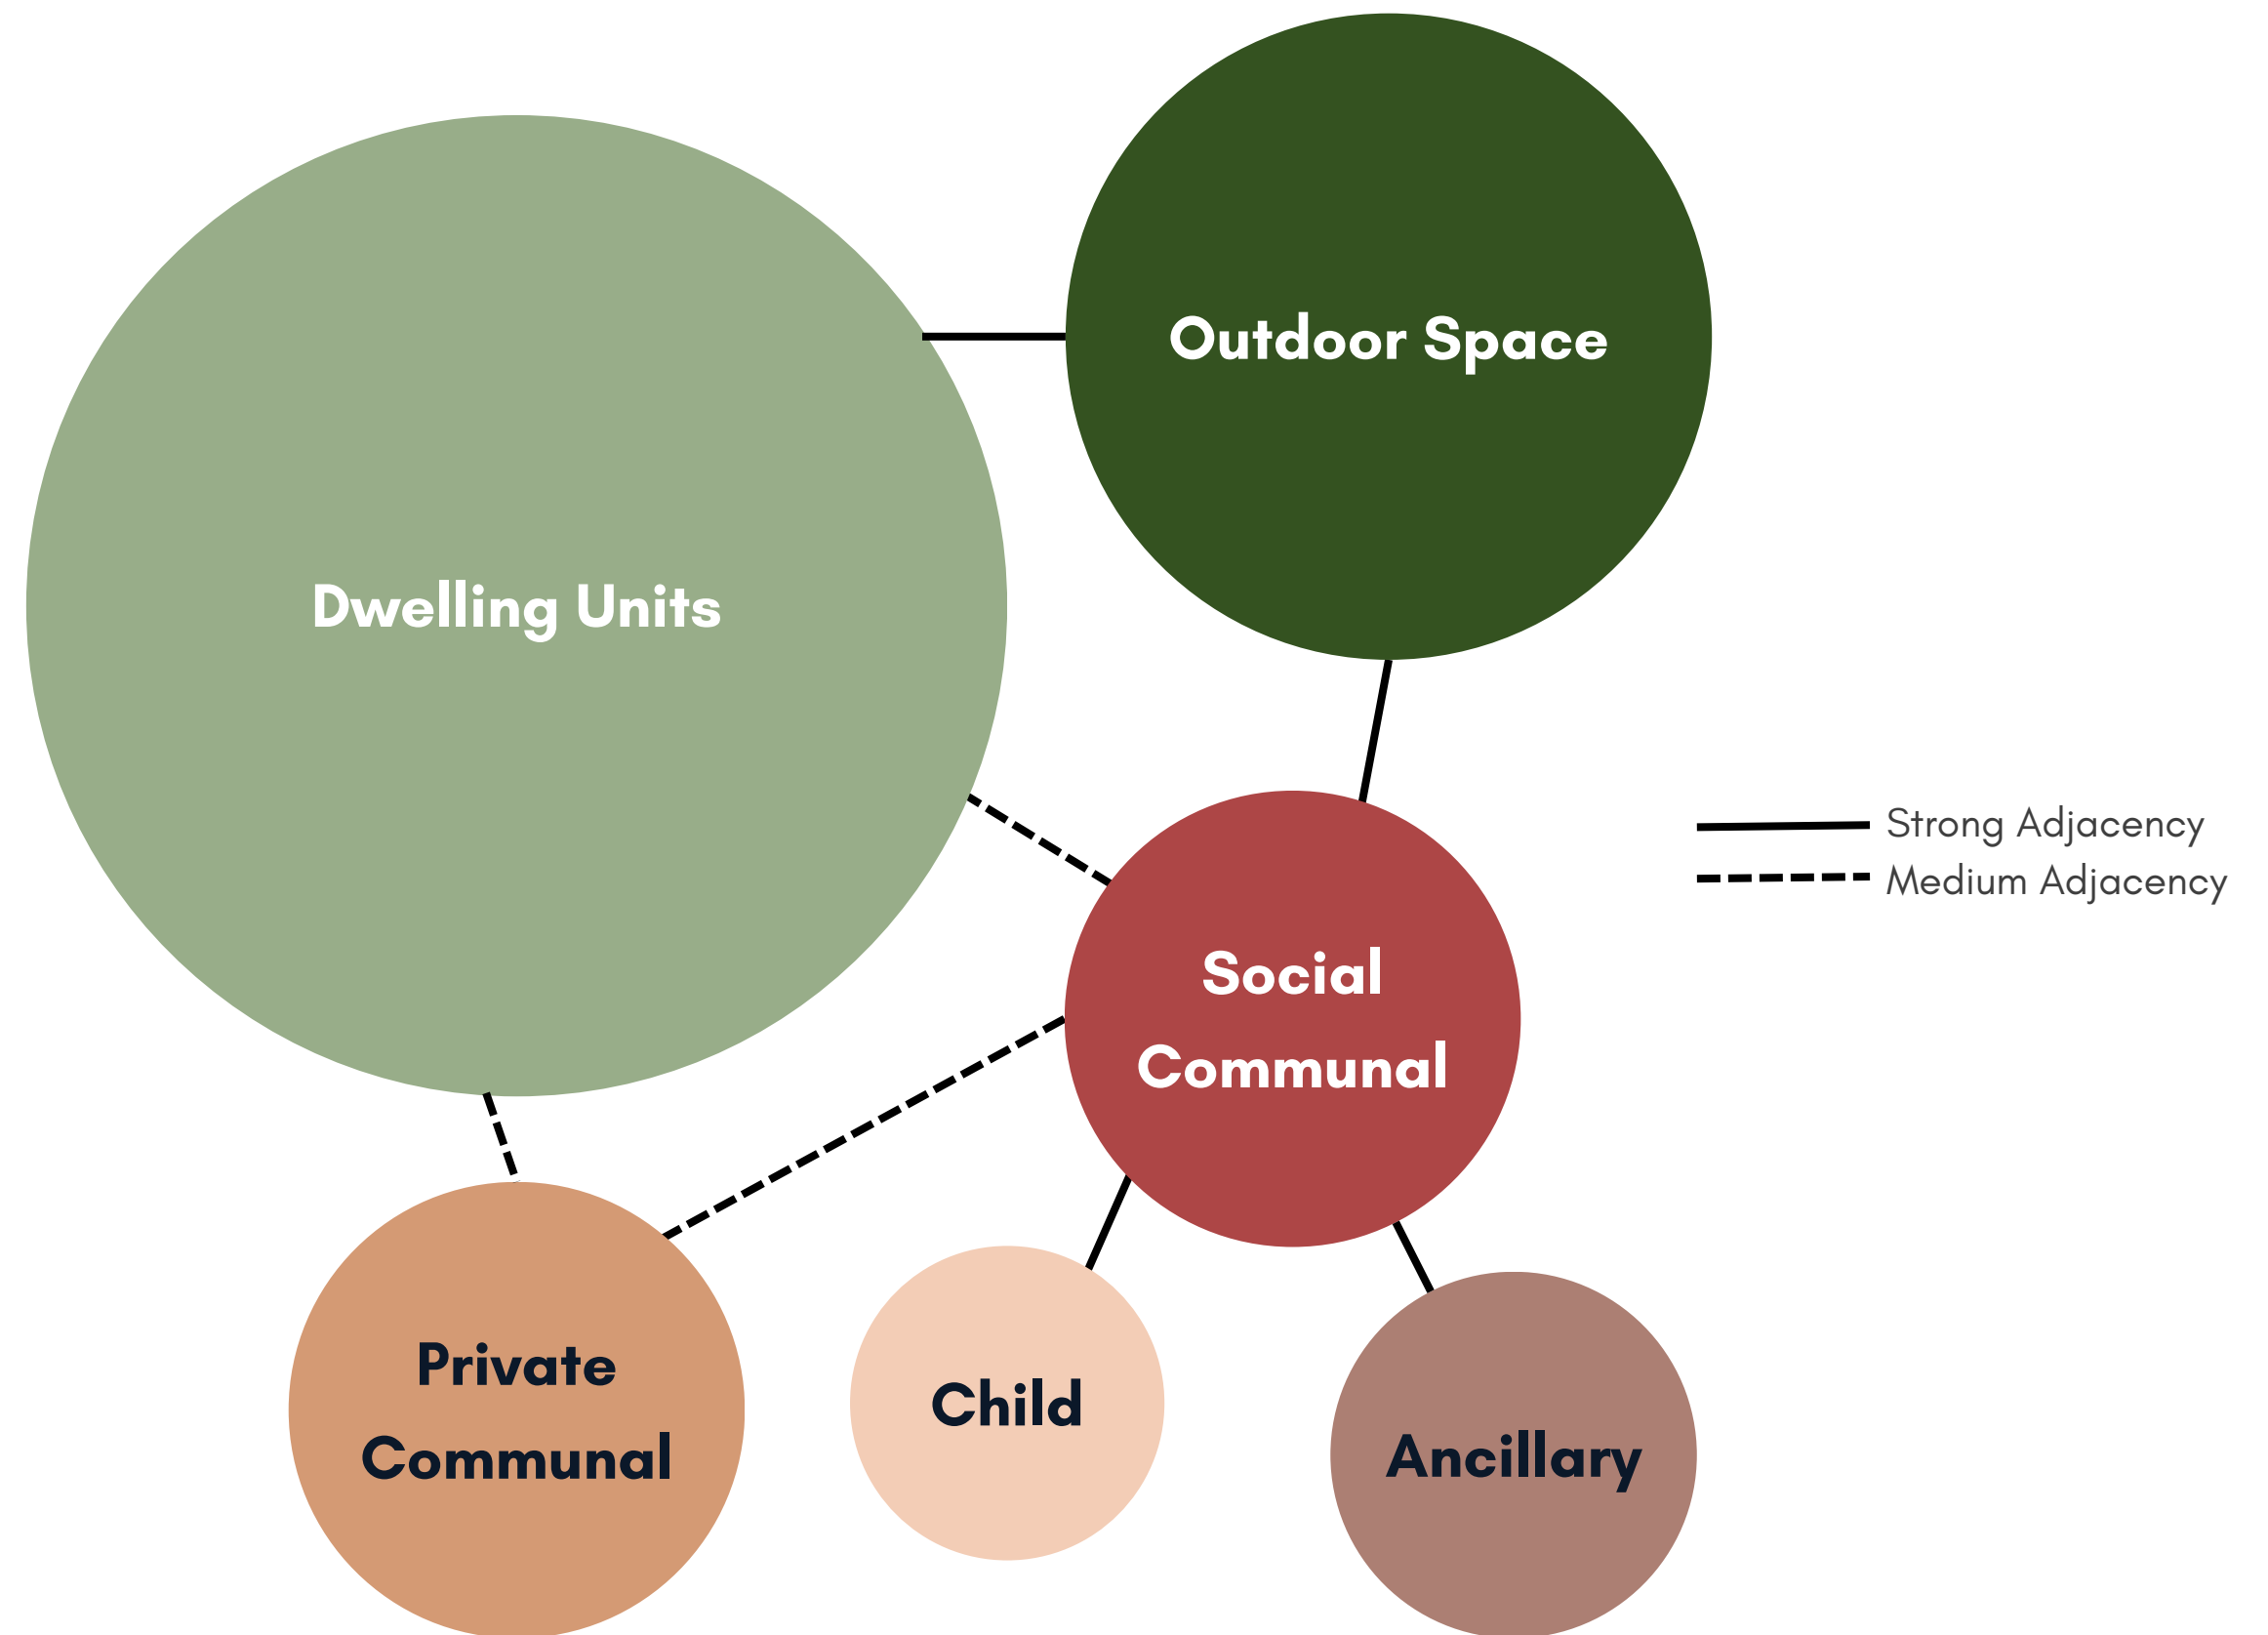

- 20 total

RESIDENTS:

- Women aged 19-70(+)
- Children aged 0-18
- Statistics dictate average 40% of users are children

SPACE REQUIREMENTS:

- Around 18,000 of planned interior space based on test fits
- Min 25 units to meet financial viability

RESEARCH

EXPOSURE TO NATURE

- Biophilia reduces symptoms of depression and anxiety
- Studies have found gardening to be a **substantially positive mental and physical health intervention**
- **Biomorphic forms** relax the brain and increase enjoyment of a space

FINDING COMMUNITY

- Surrounding oneself with like-minded survivors of trauma **buffers against PTSD**; Poor social exposure is one of the strongest predictors of development of PTSD
- The oxytocin released from meaningful social support can lessen the chances of turning to drugs and alcohol

A FOCUS ON CHILDREN

- A mother will only leave if she can **protect her children**
- Seeing children experience joy makes adults feel joyful as well

RESEARCH

EXPOSURE TO NATURE

- The oxytocin released from meaningful social support can lessen the chances of turning to drugs and alcohol

A FOCUS ON CHILDREN

- A mother will only leave if she can **protect her children**
- Seeing children experience joy makes adults feel joyful as well

COCOON

The Atwood will mimic the properties of a cocoon; a **layered, protective, community-focused** home that supports **women** and their **children** through their growth after trauma. Biophelia and biomorphic forms will define the space and highly conceptual nodes remind users of varying seasonal moments.

LOCATION

SITE PLAN

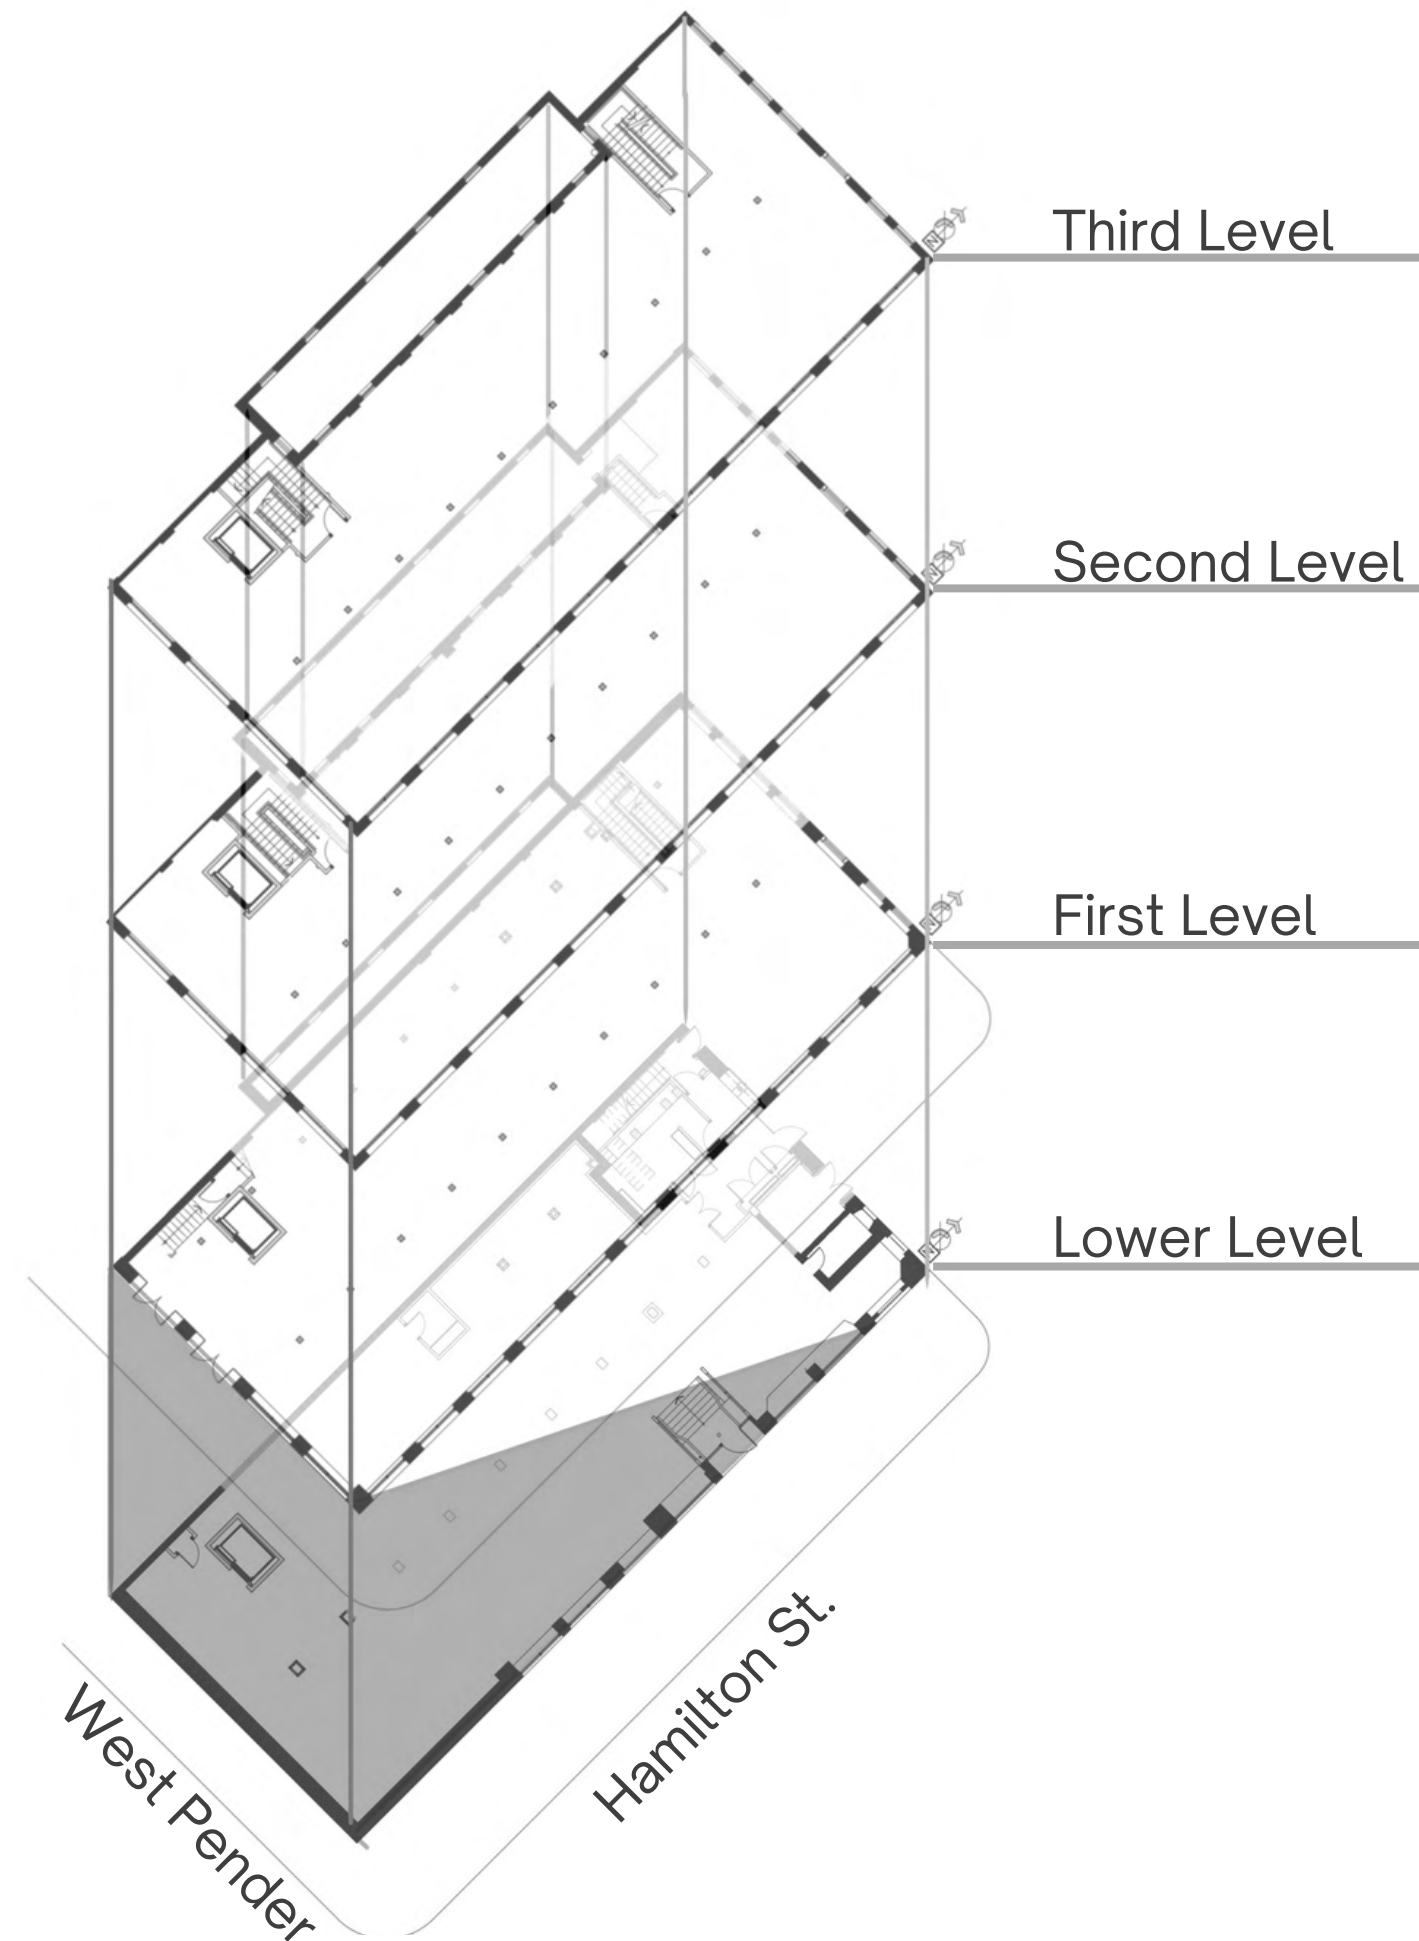

Site is in the heart of Crosstown
A transitional neighbourhood

303 West Pender St.
Cross Streets: West Pender & Hamilton

Pedestrian/ Transit Friendly
Walk & Transit Score: 98+

BUILDING

303 West Pender
Vancouver, BC

Built in 1906
Formerly a newsprint building

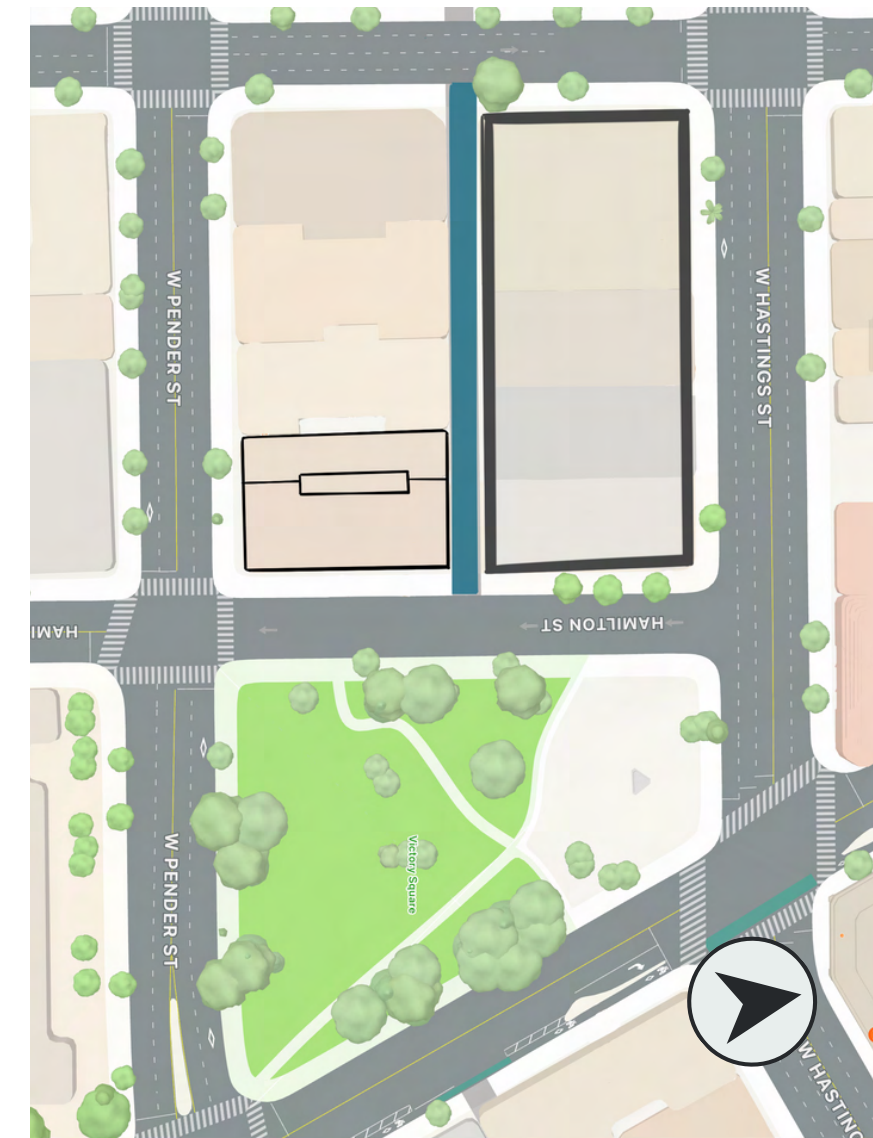

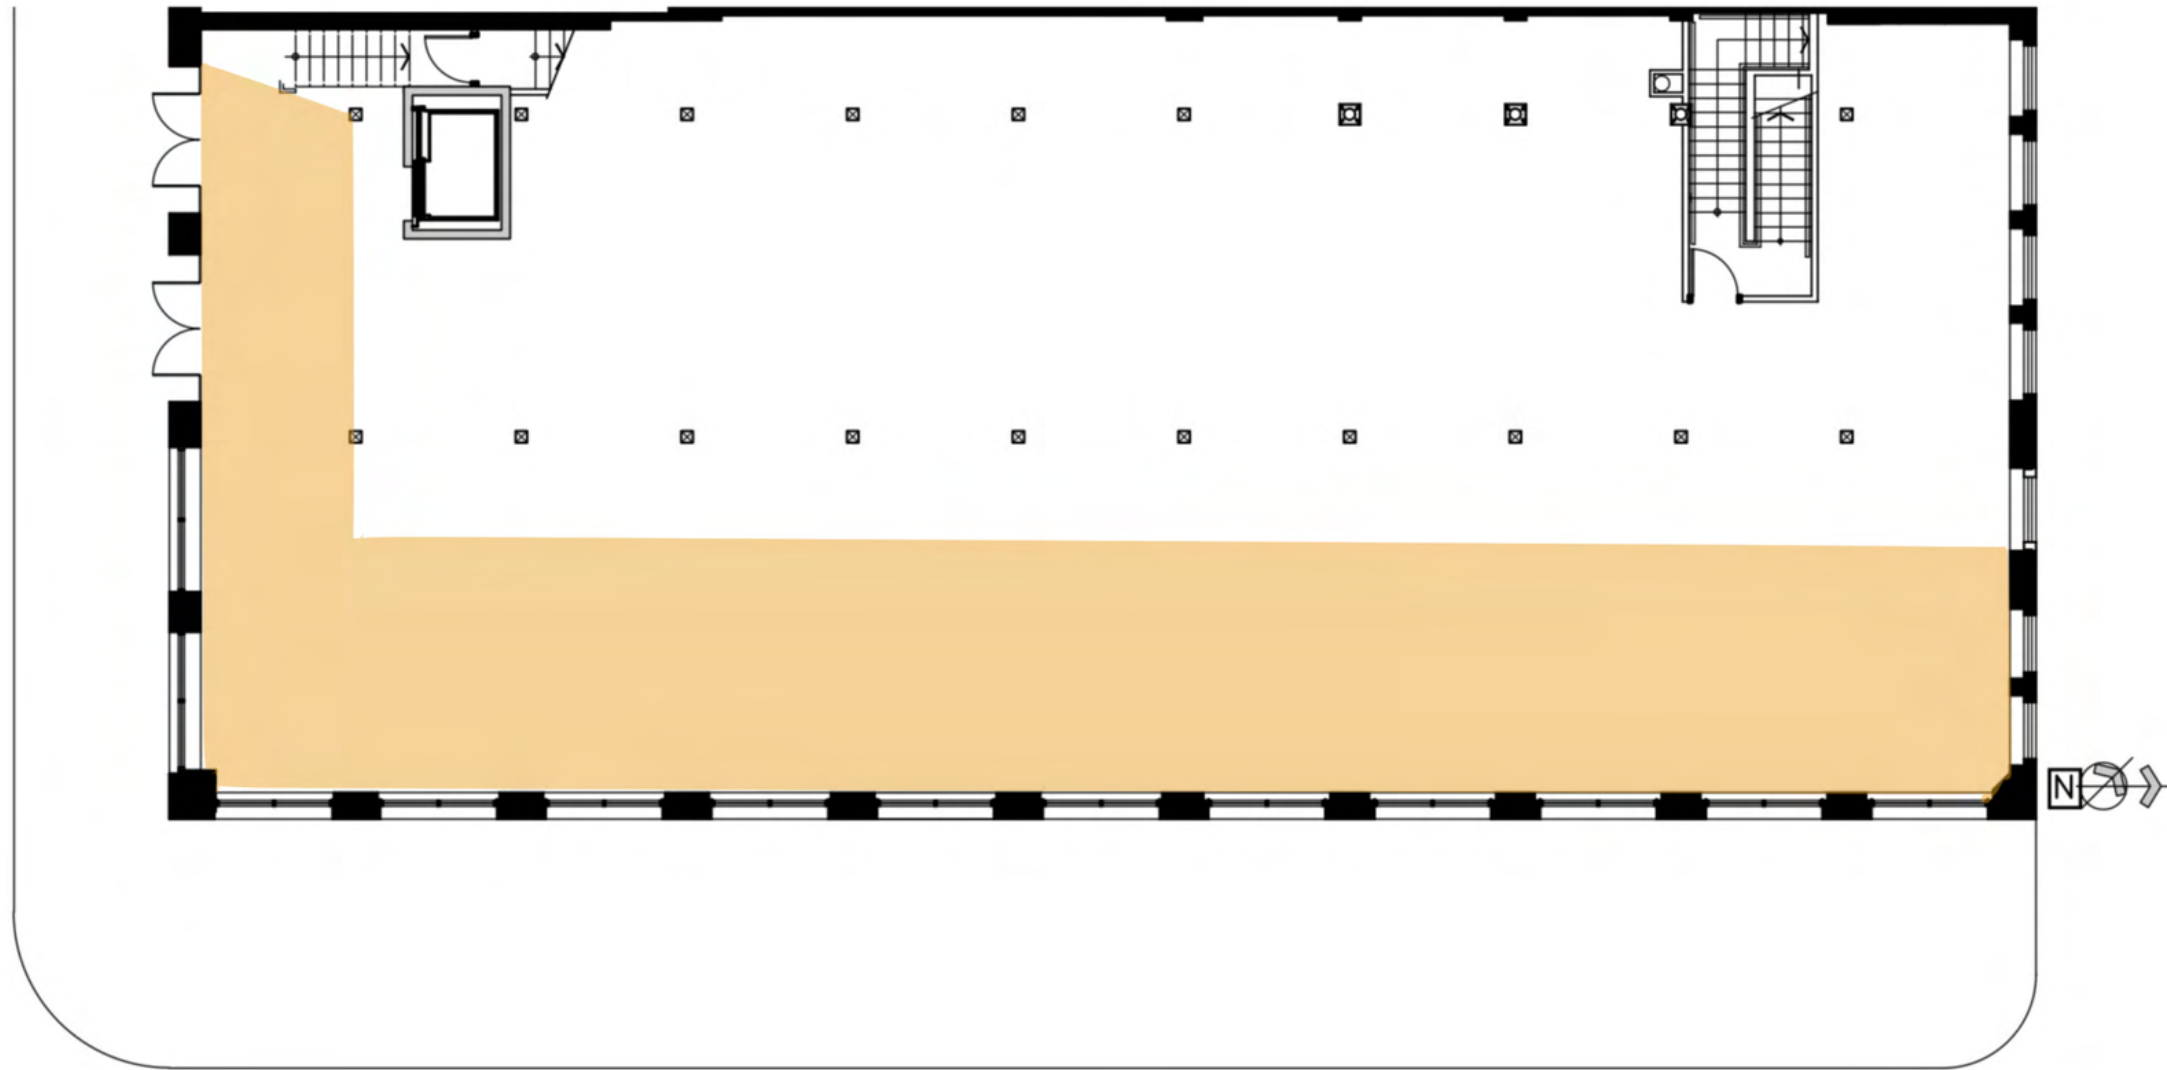

4 Storeys
Plus rooftop

20,000 Square Feet
Each floor plate is 4,995 ft.'

Partially Below-Grade
Lower Level receives no light in corner

DAYLIGHT

East-facing light floods in morning sun, but the afternoons and evenings will need to rely on artificial lighting strategies

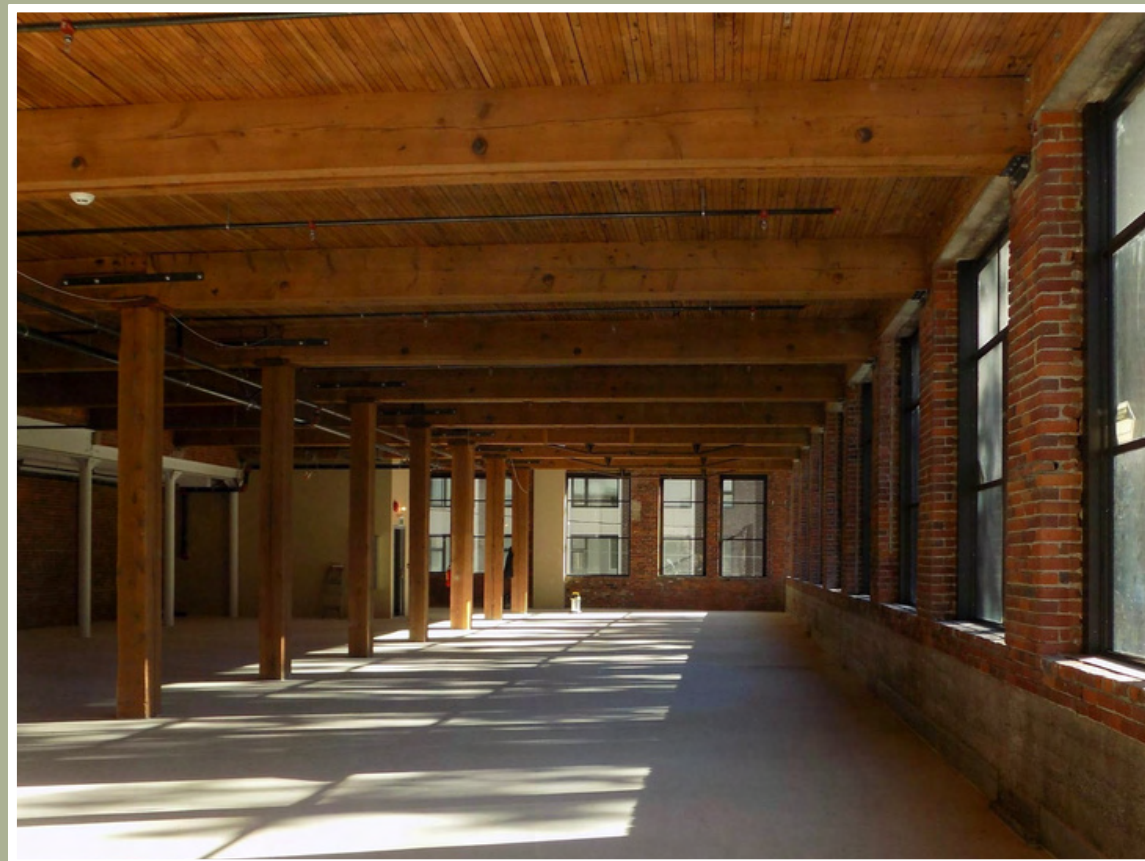

BUILDING STRUCTURE

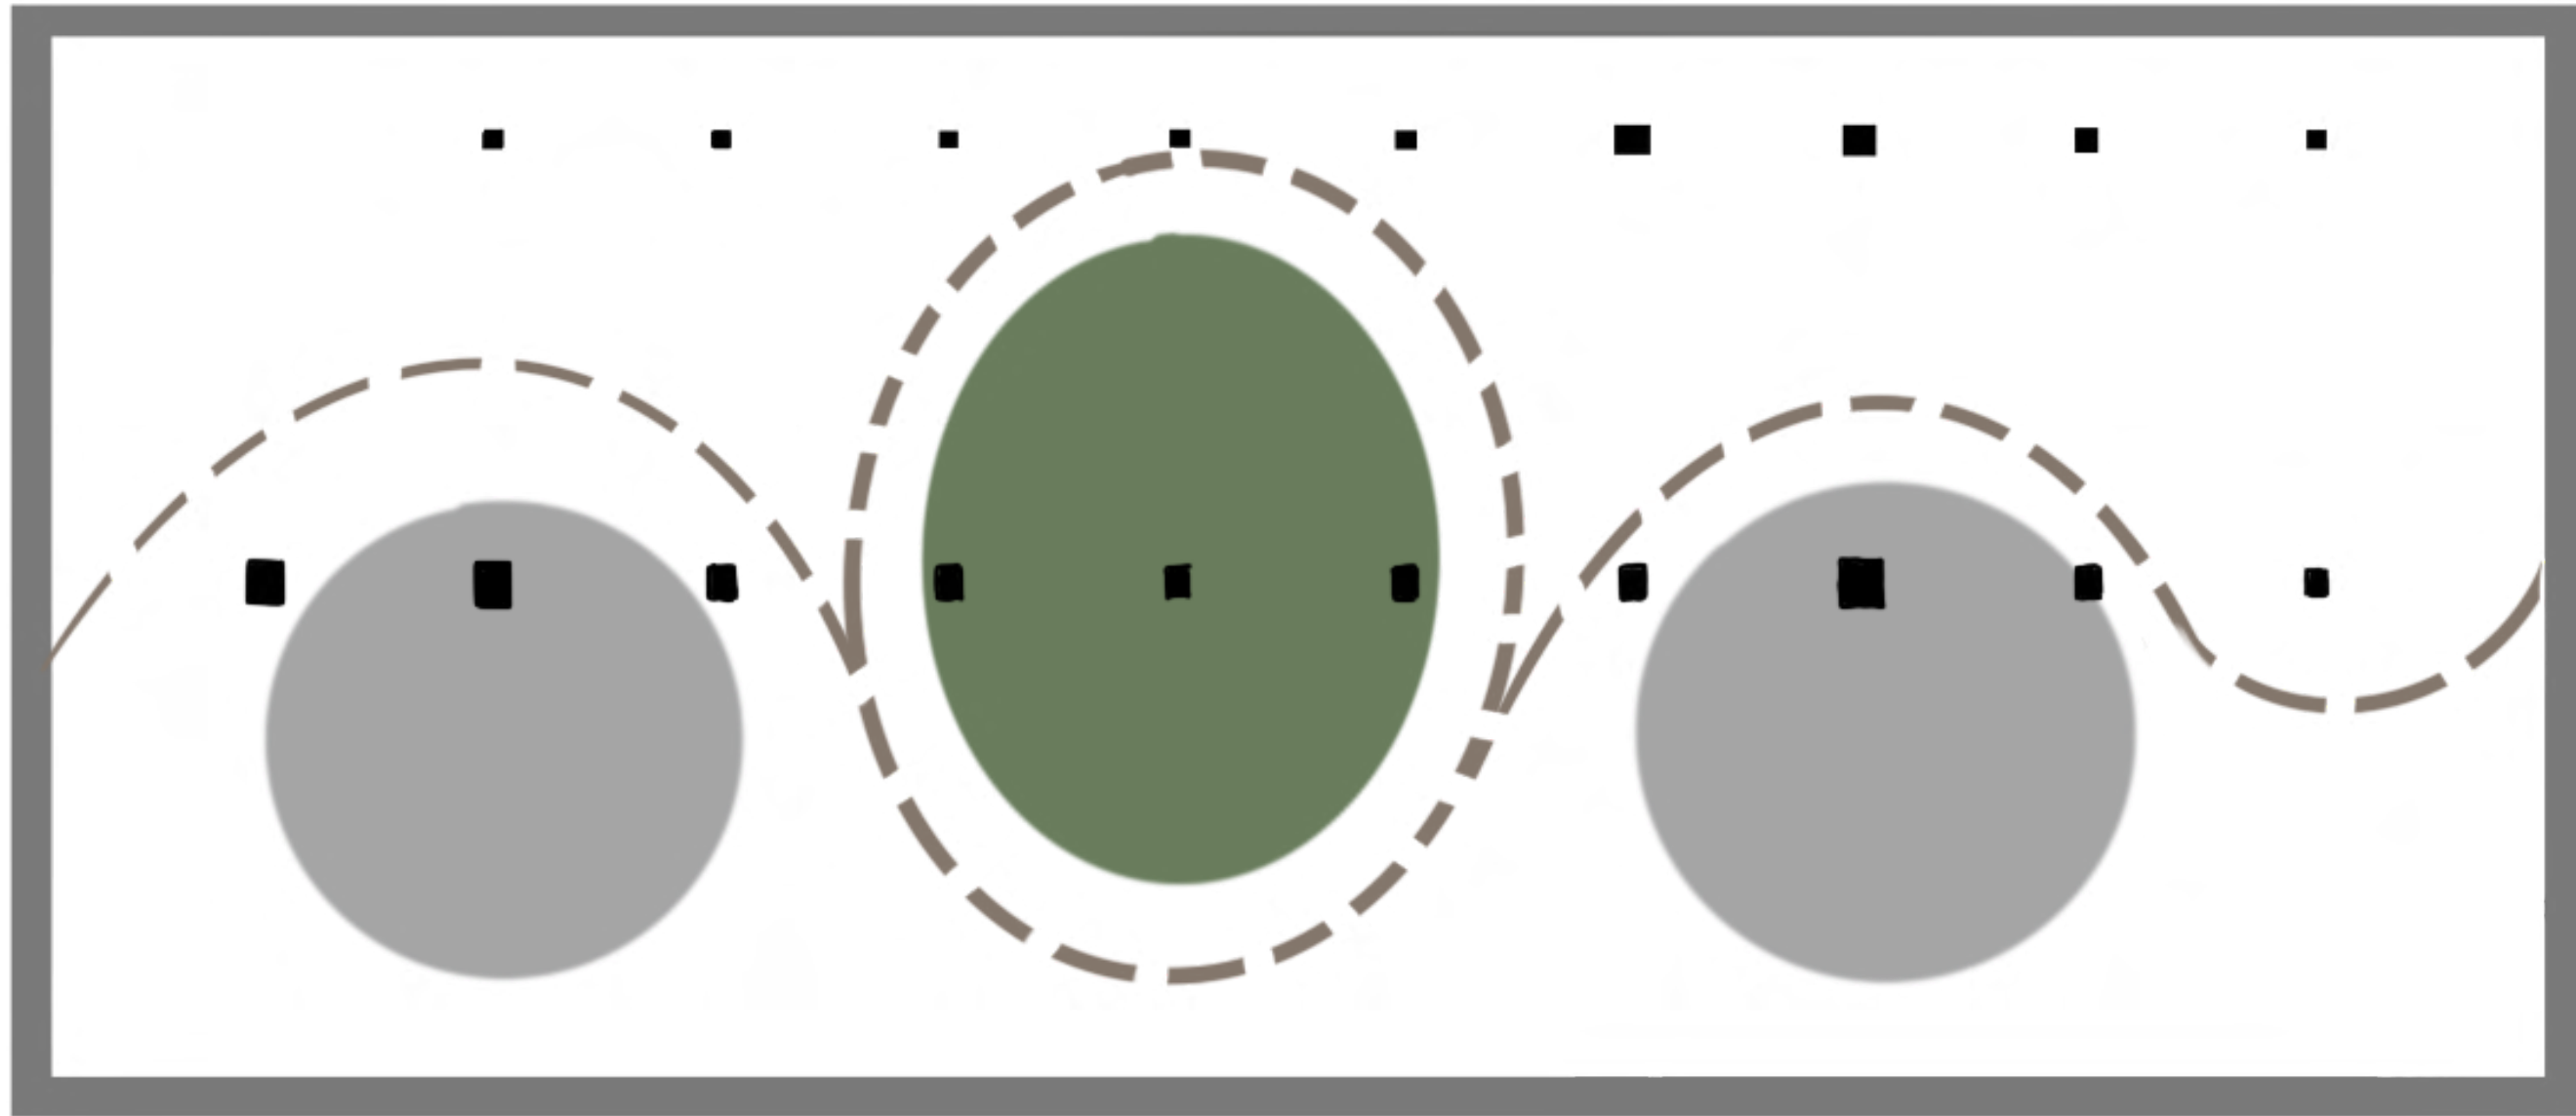

Exposed combustible building materials

- Fir beams & columns

Beams run every 10'-8" o.c.
East-West

Sustainable Strategy = Keeping Shell

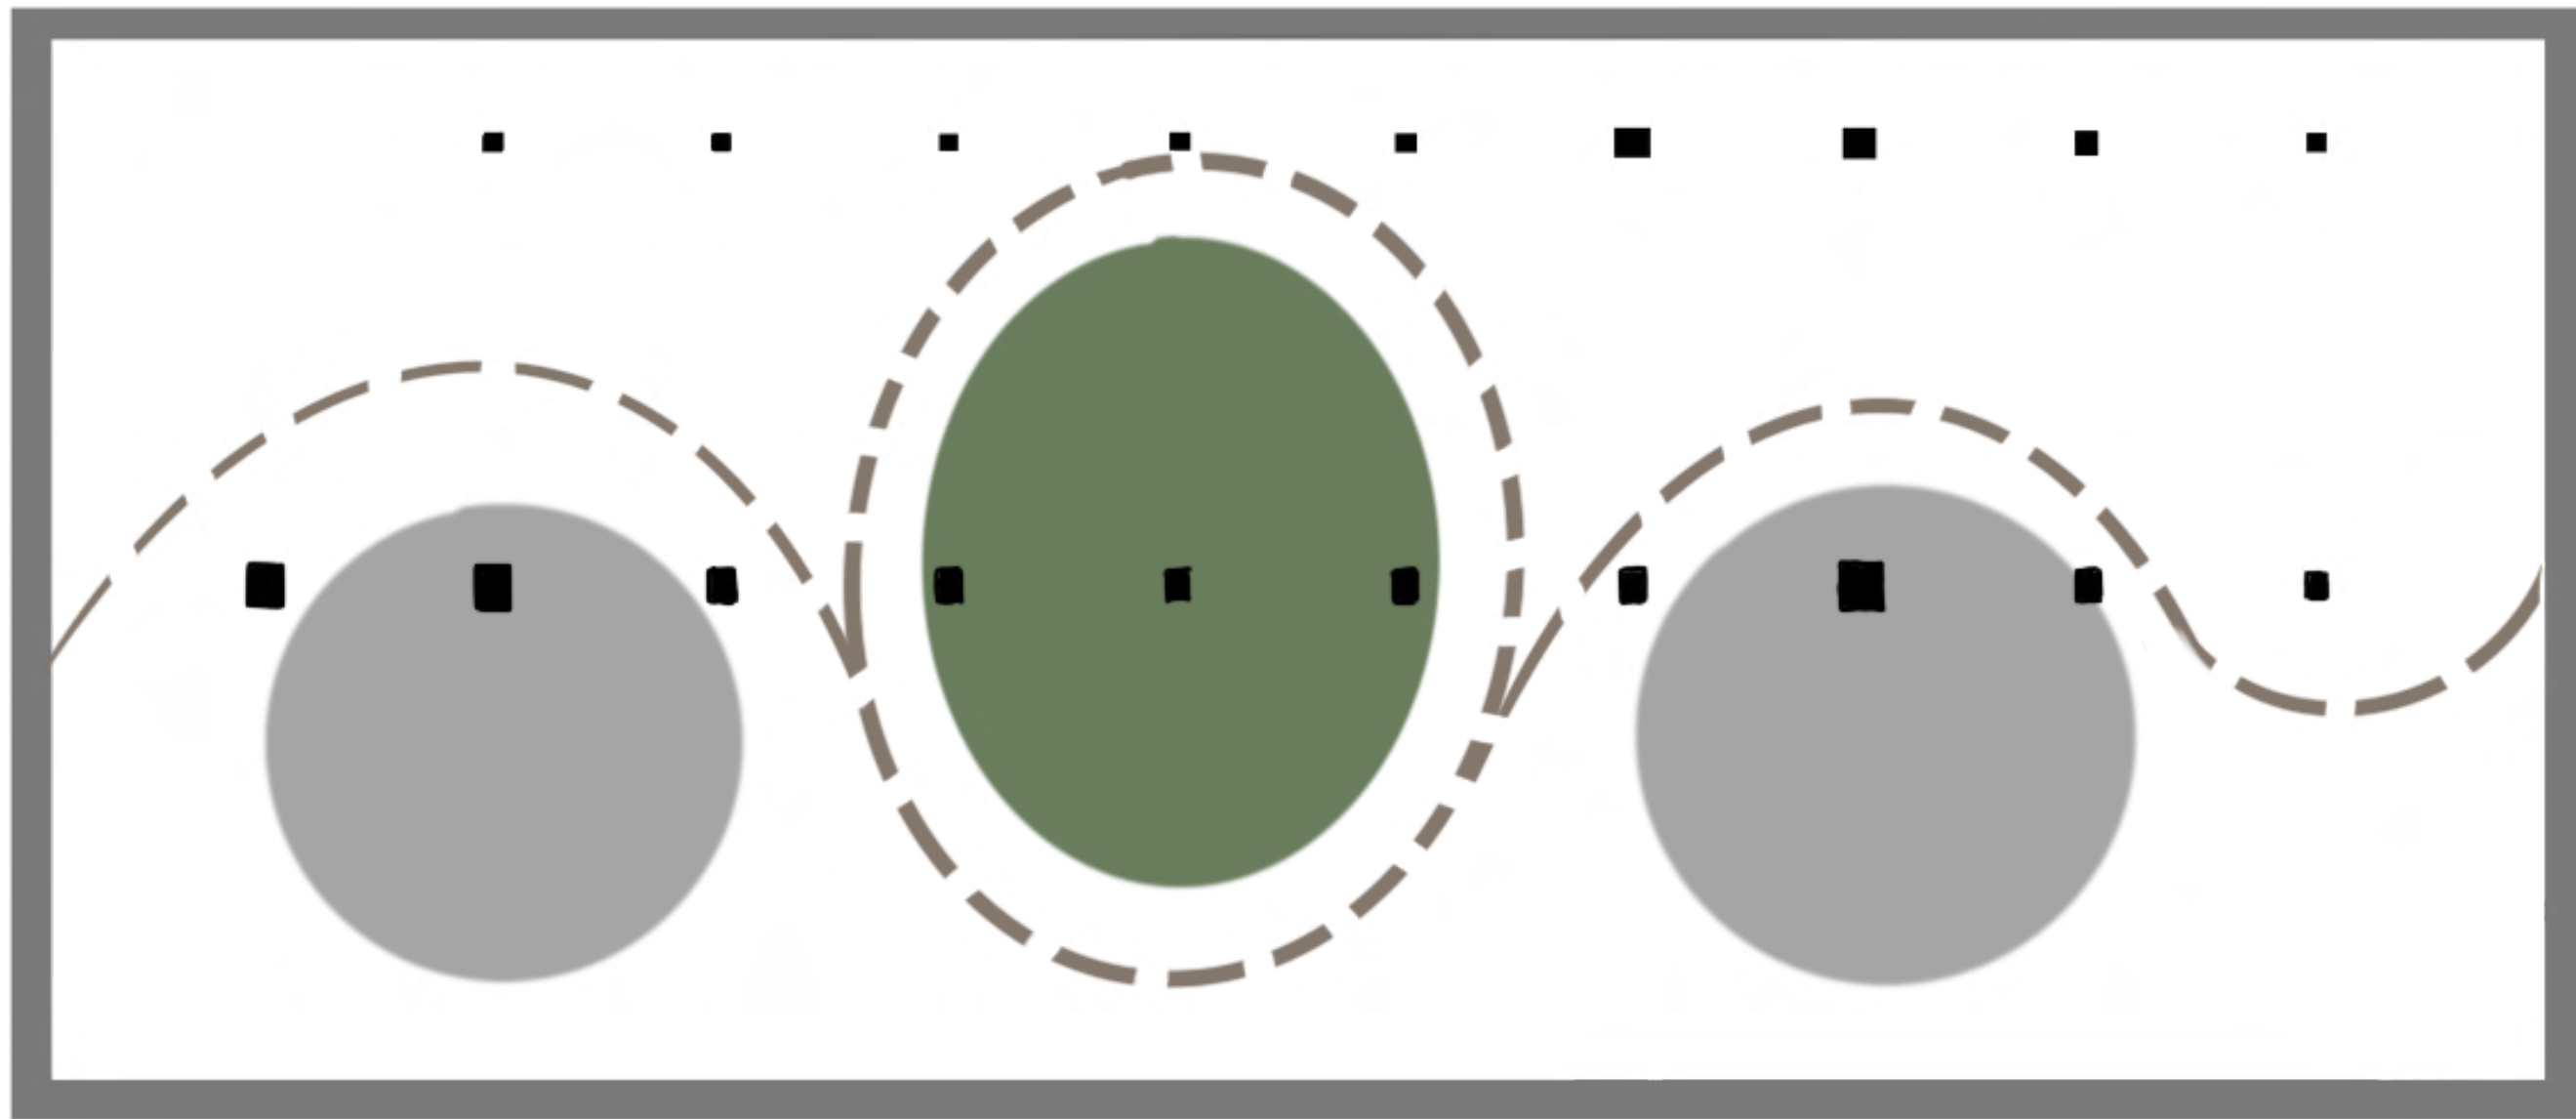

PARTI

[ARCHITECTURAL]

Adding curves and **free-flowing circulation** to an otherwise rectilinear & predictable rectilinear envelope.

PART I

[ARCHITECTURAL]

Adding curves and **free-flowing circulation** to an otherwise rectilinear & predictable rectilinear envelope.

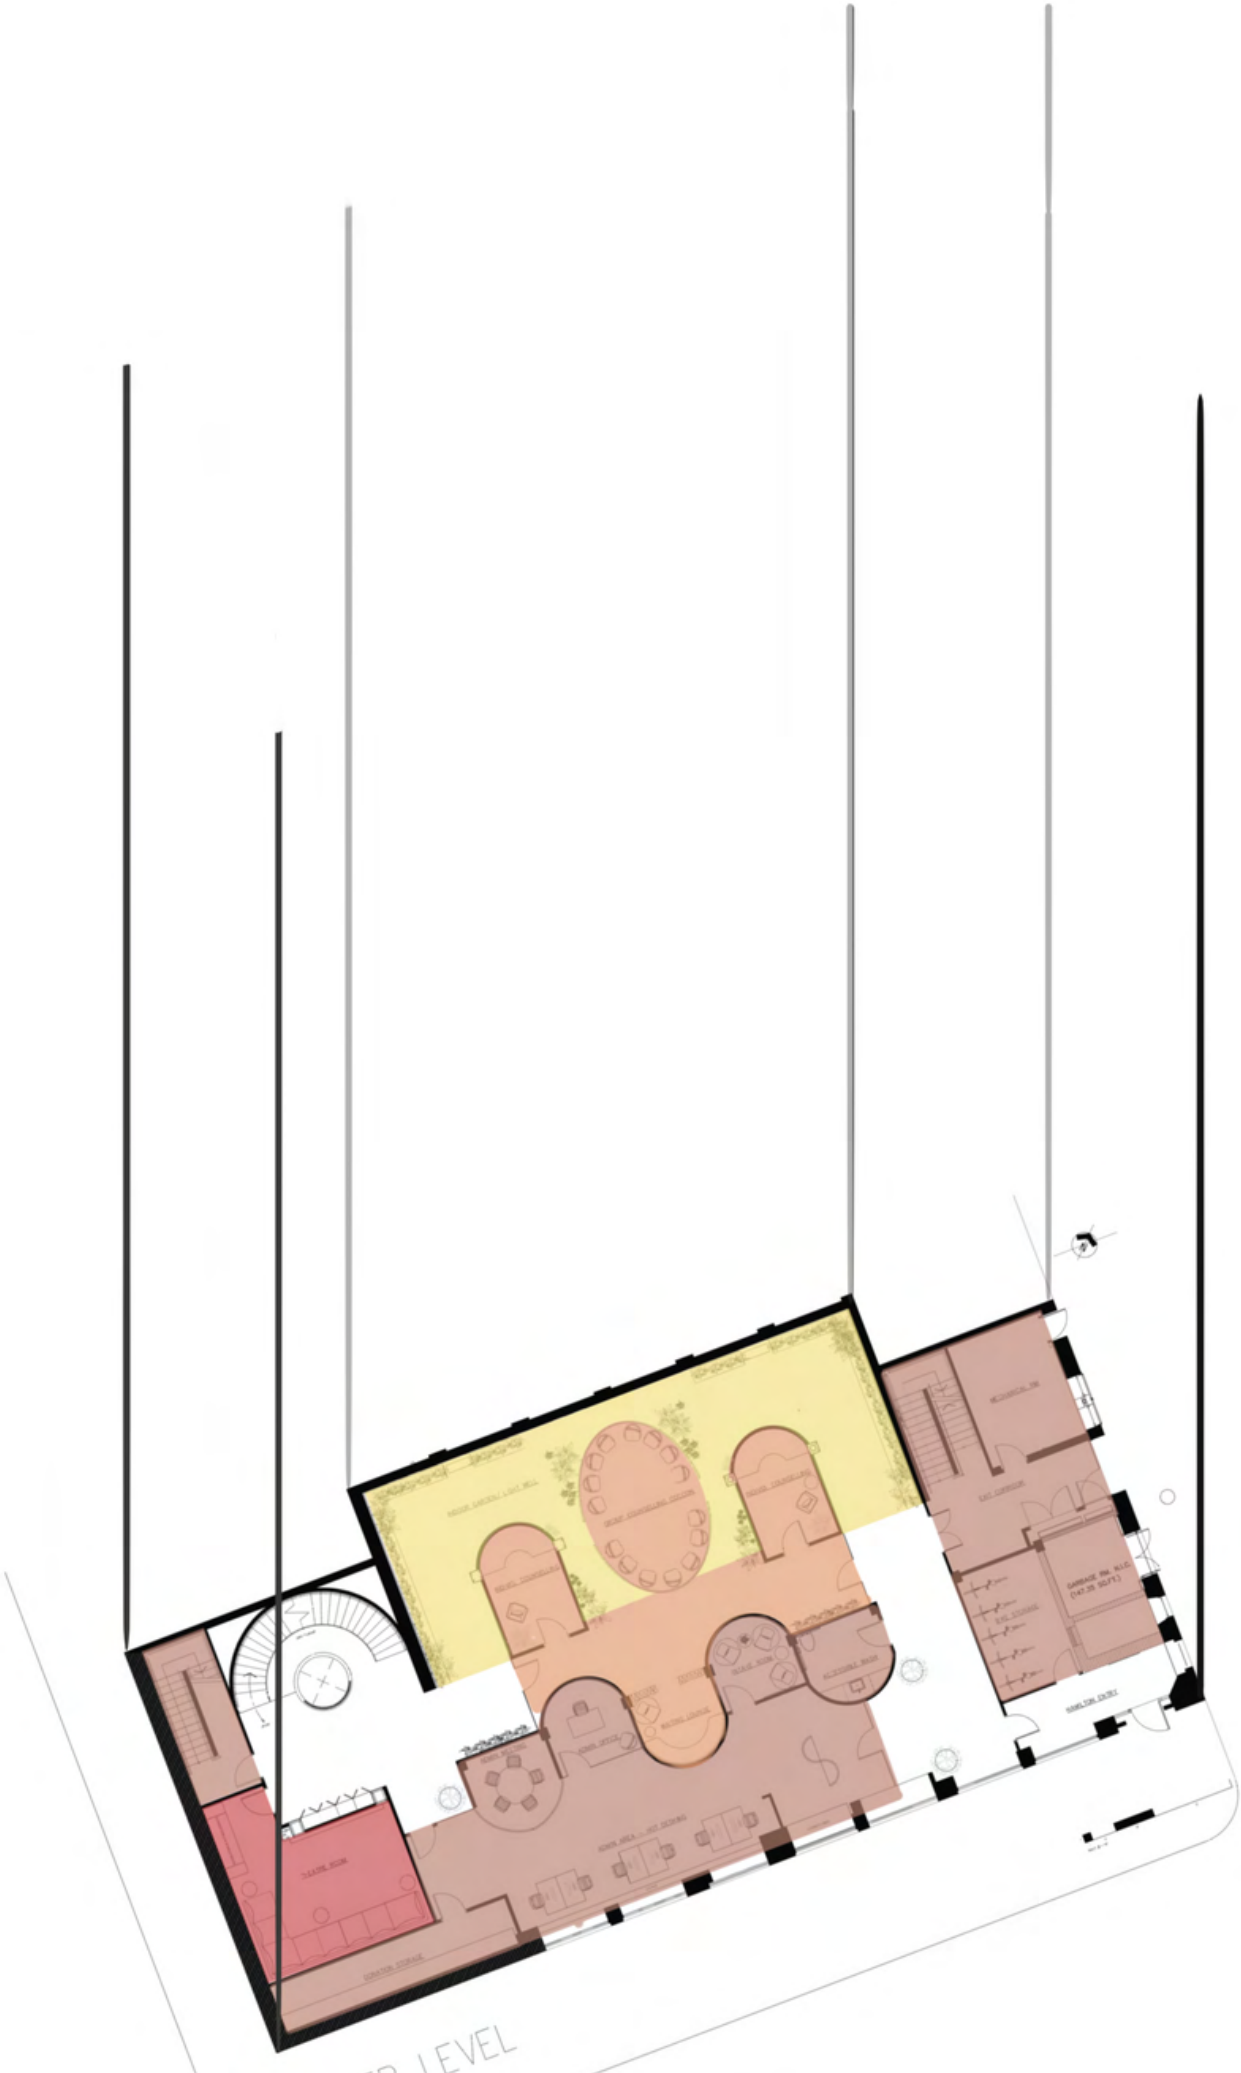

Juxtaposition of **rectilinear** and **curvilinear** elements. Central curved gestures.

PROGRAM DISTRIBUTION

The building is **20,000 square feet** evenly divided over **4 floors**

Lower Level is Communal

Outdoor	
Ancillary

Unassuming for those not in the know

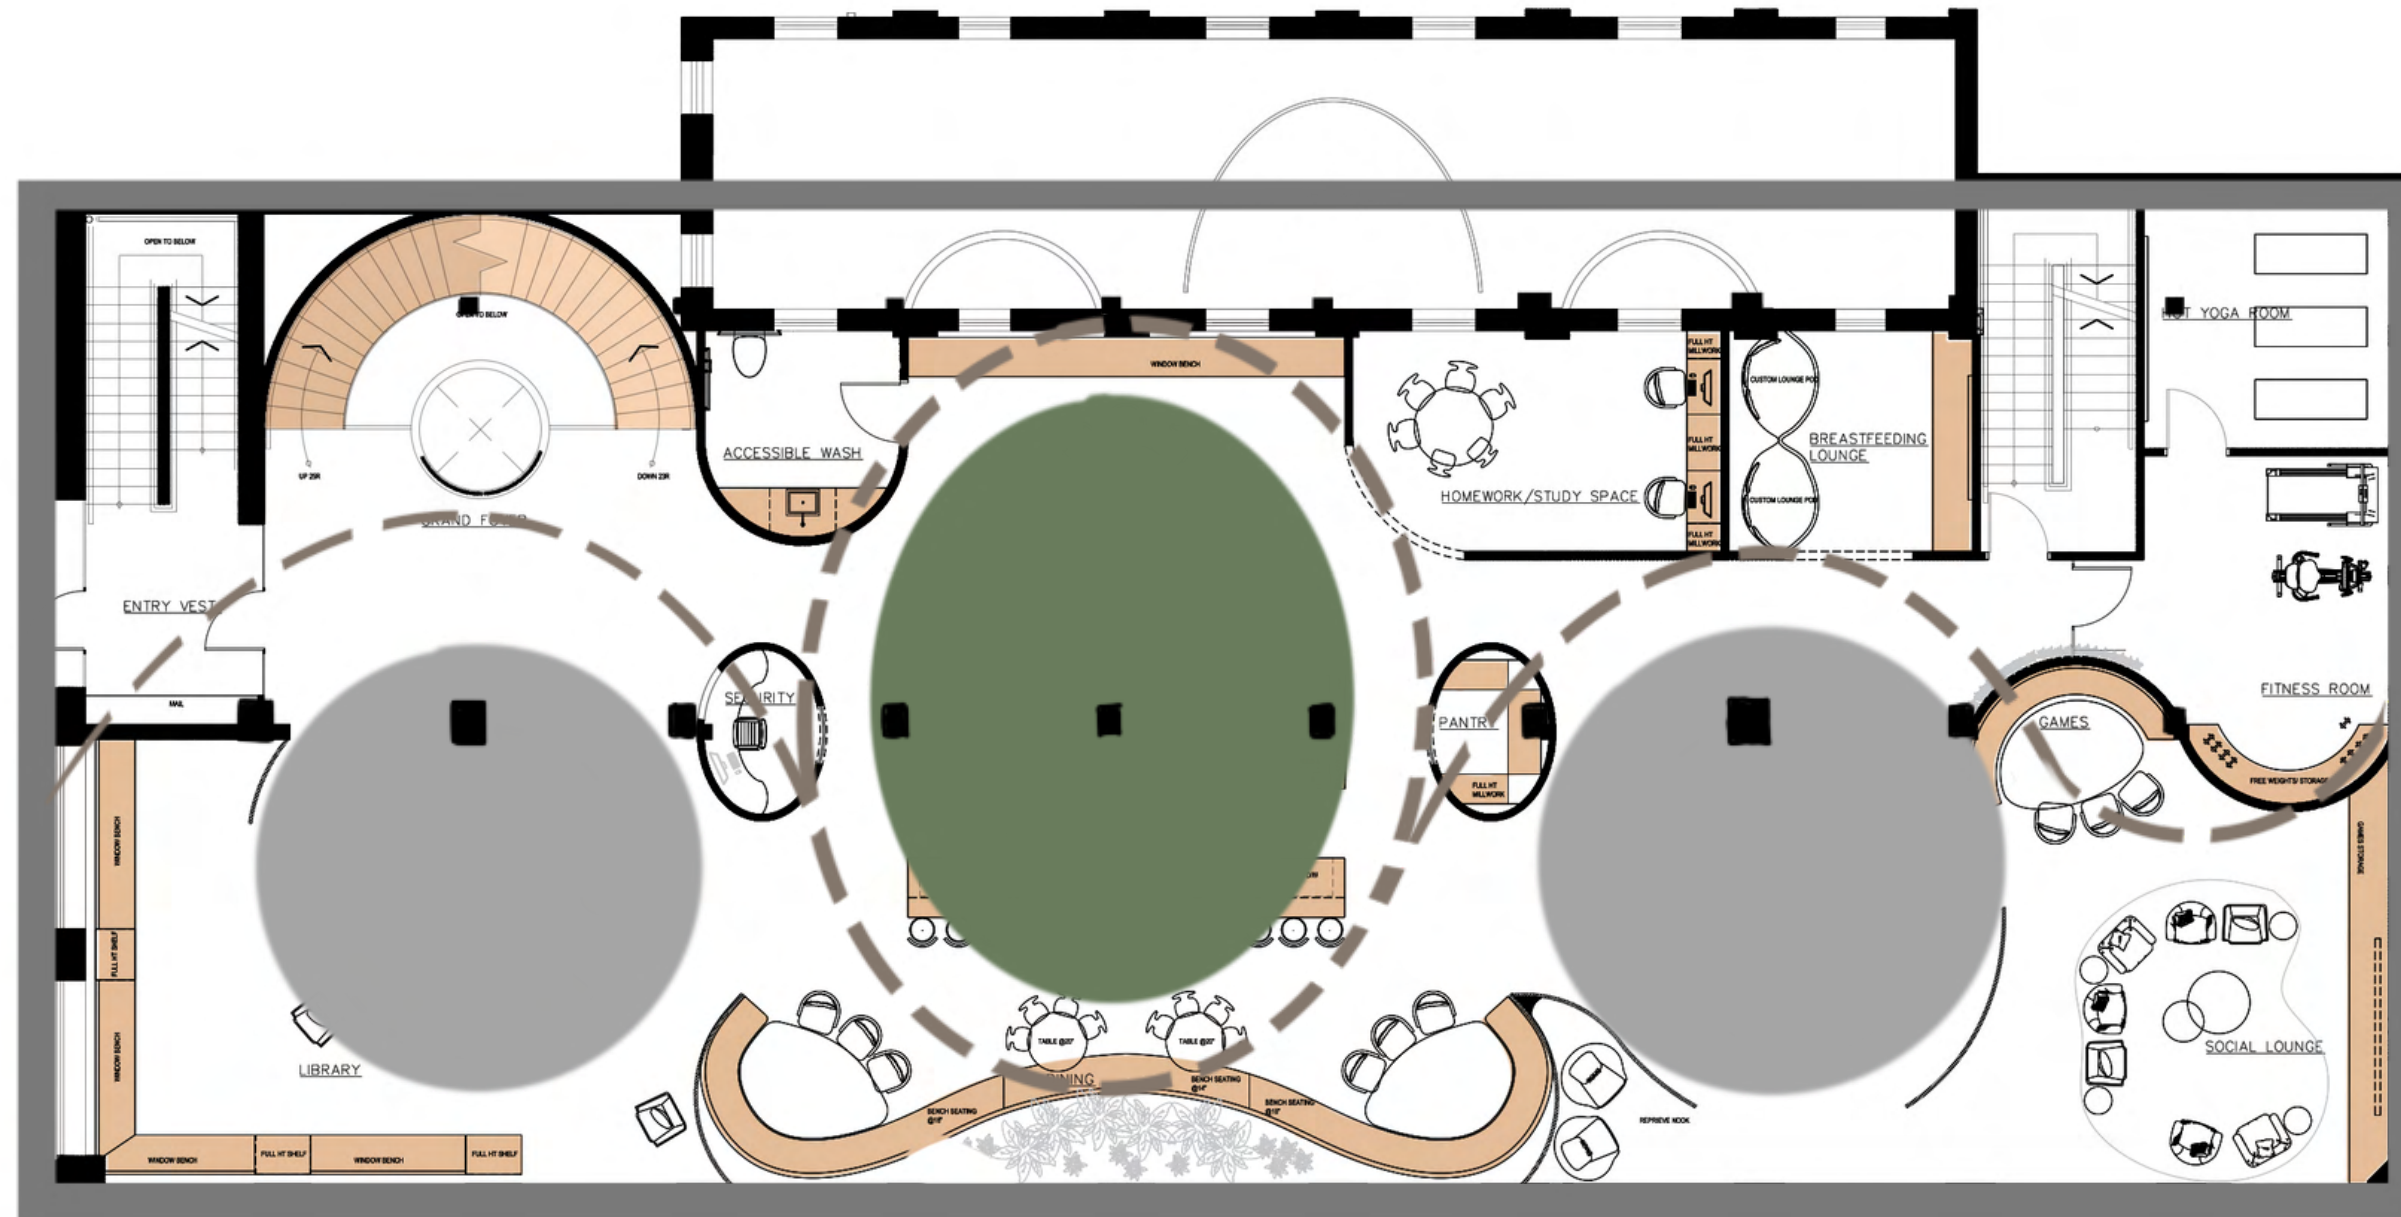

ARCHITECTURAL PART I

Adding curves and **free-flowing circulation** to an otherwise rectilinear & predictable rectilinear envelope.

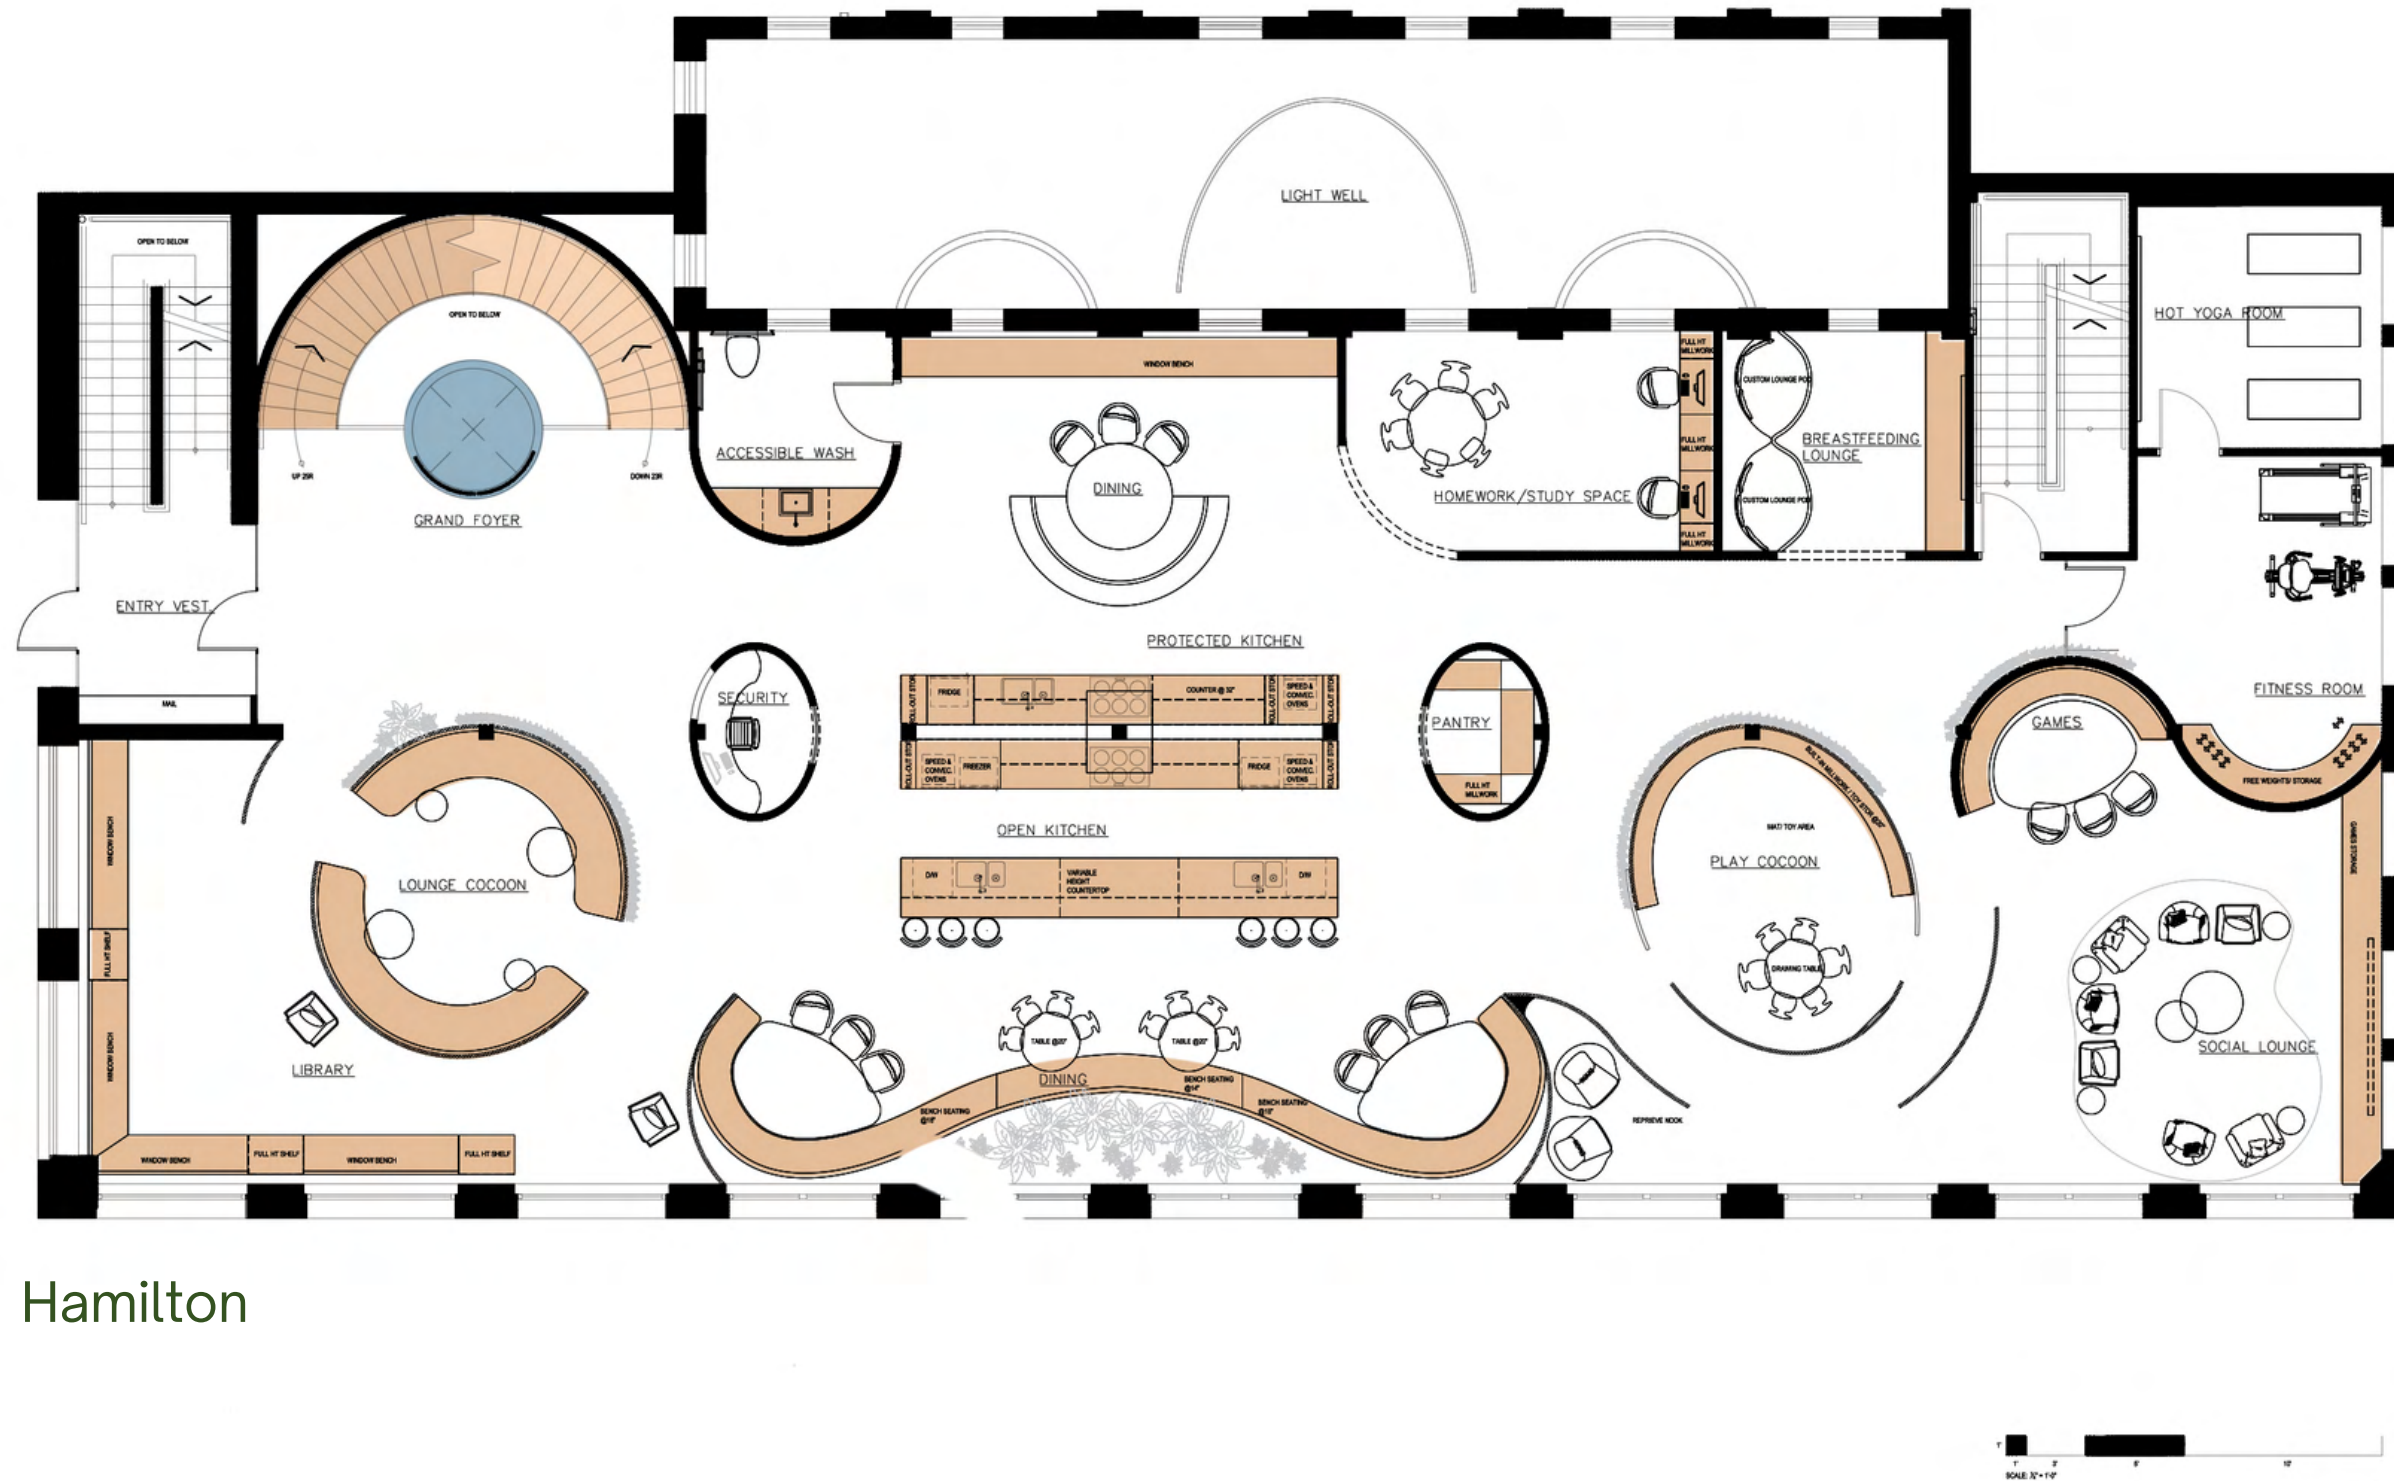

Hamilton

FIRST LEVEL | COMMUNAL

Adding curves and **free-flowing circulation** to an otherwise rectilinear & predictable rectilinear envelope.

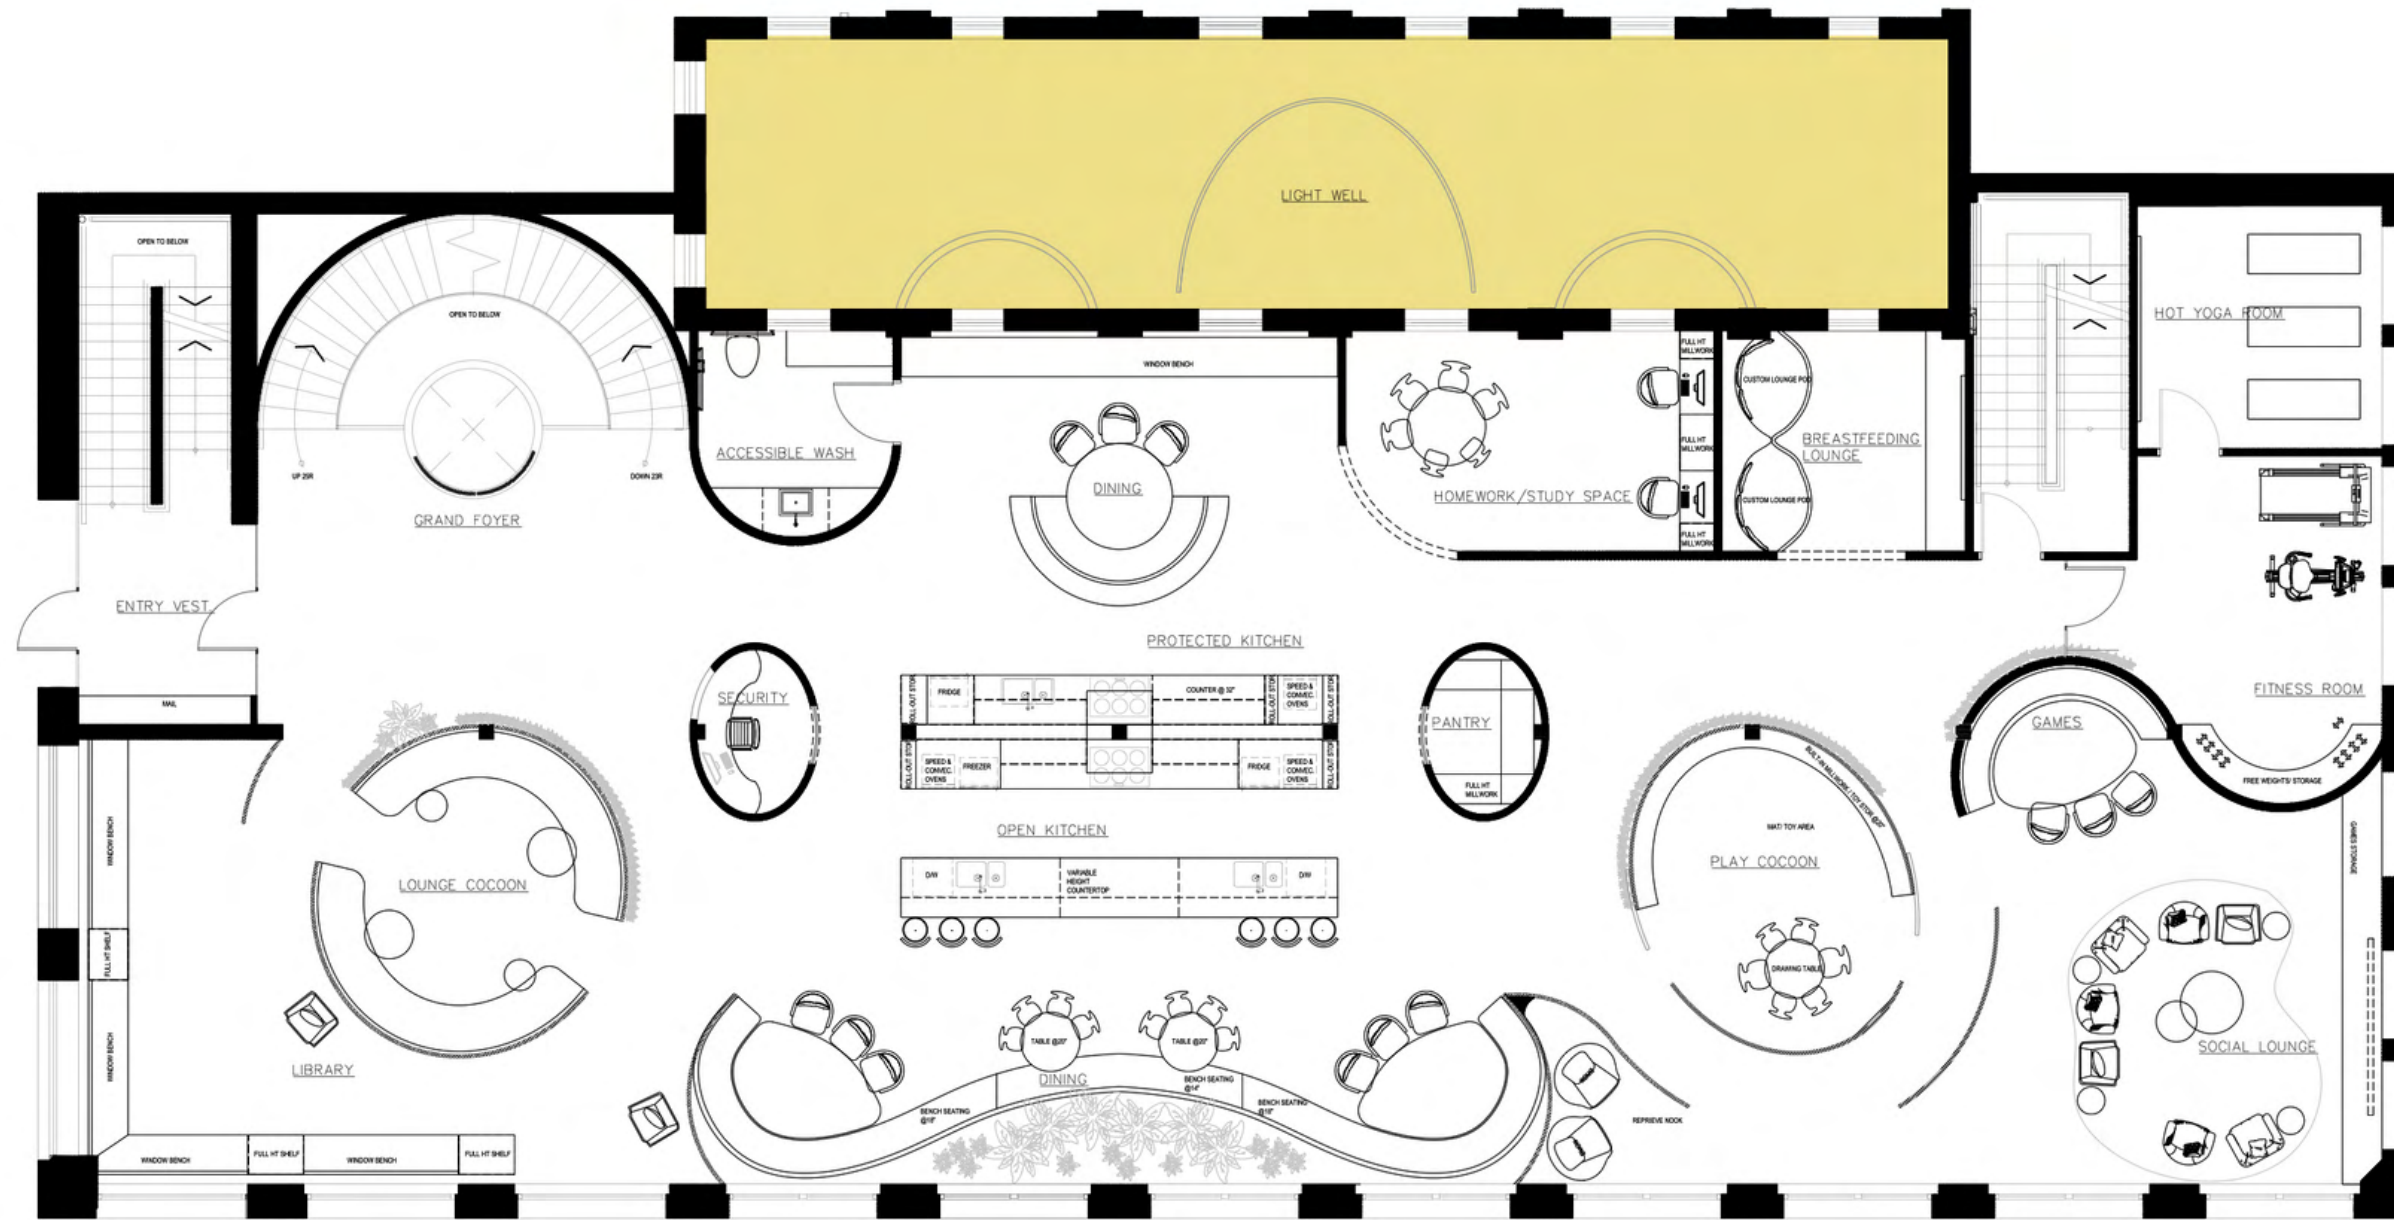

FIRST LEVEL | COMMUNAL

The building was designed as a residence for all to share; complete with lounges, kitchens, and spaces to support wellness

Hamilton

Light Well

Ancillary

Private Communal

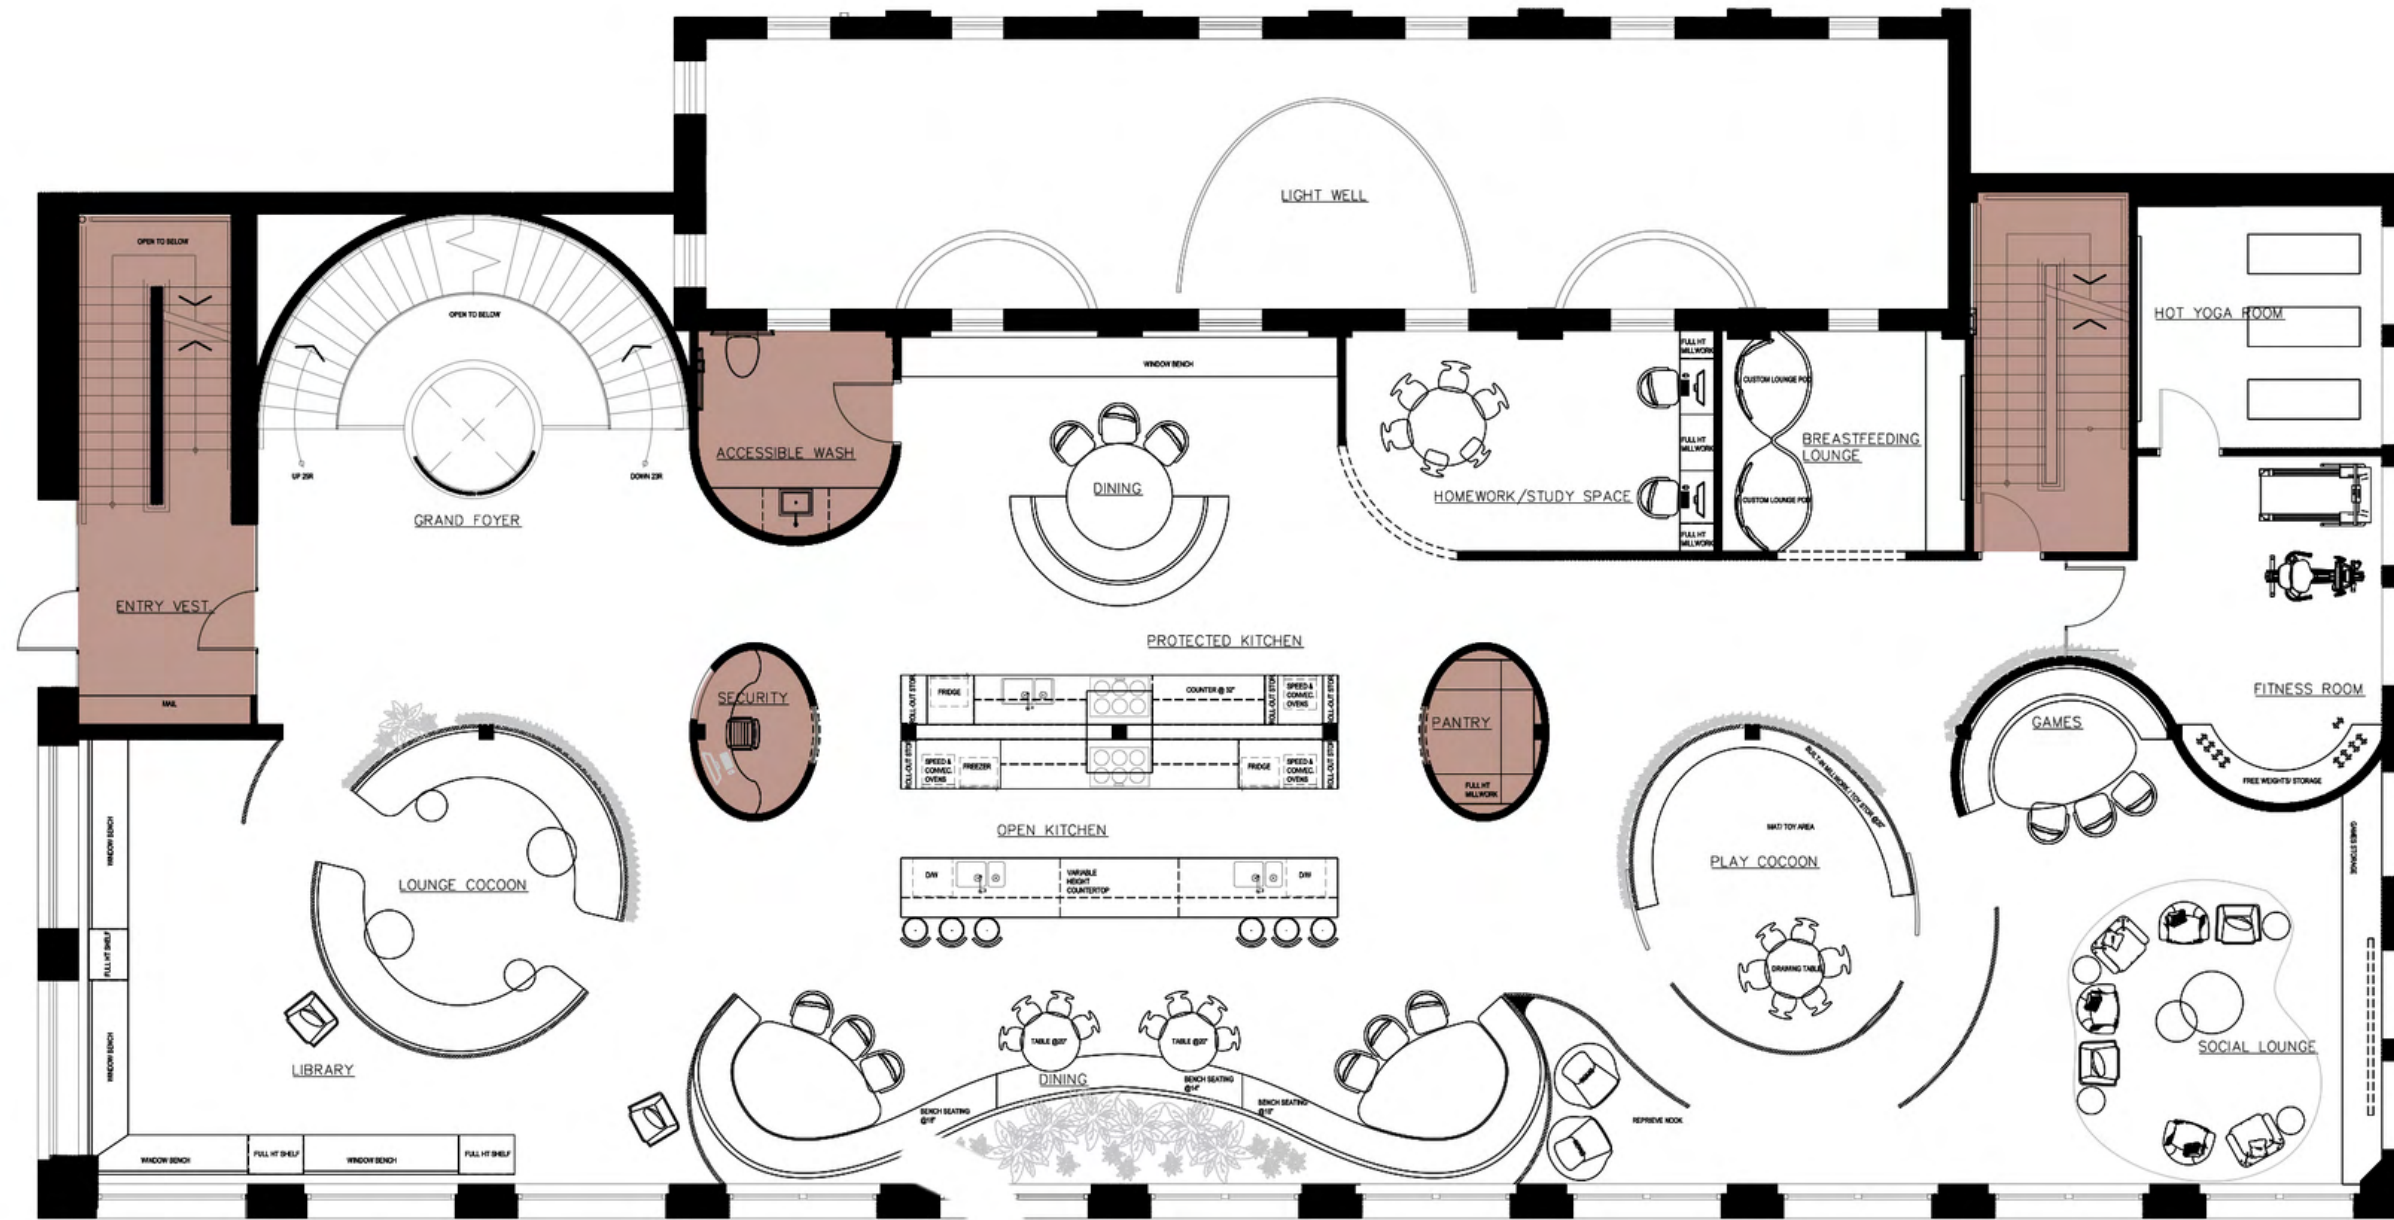

Social Communal

Child Focused

FIRST LEVEL | ZONING

Light Well was **expanded** down to provide light and fresh air to the middle of the building

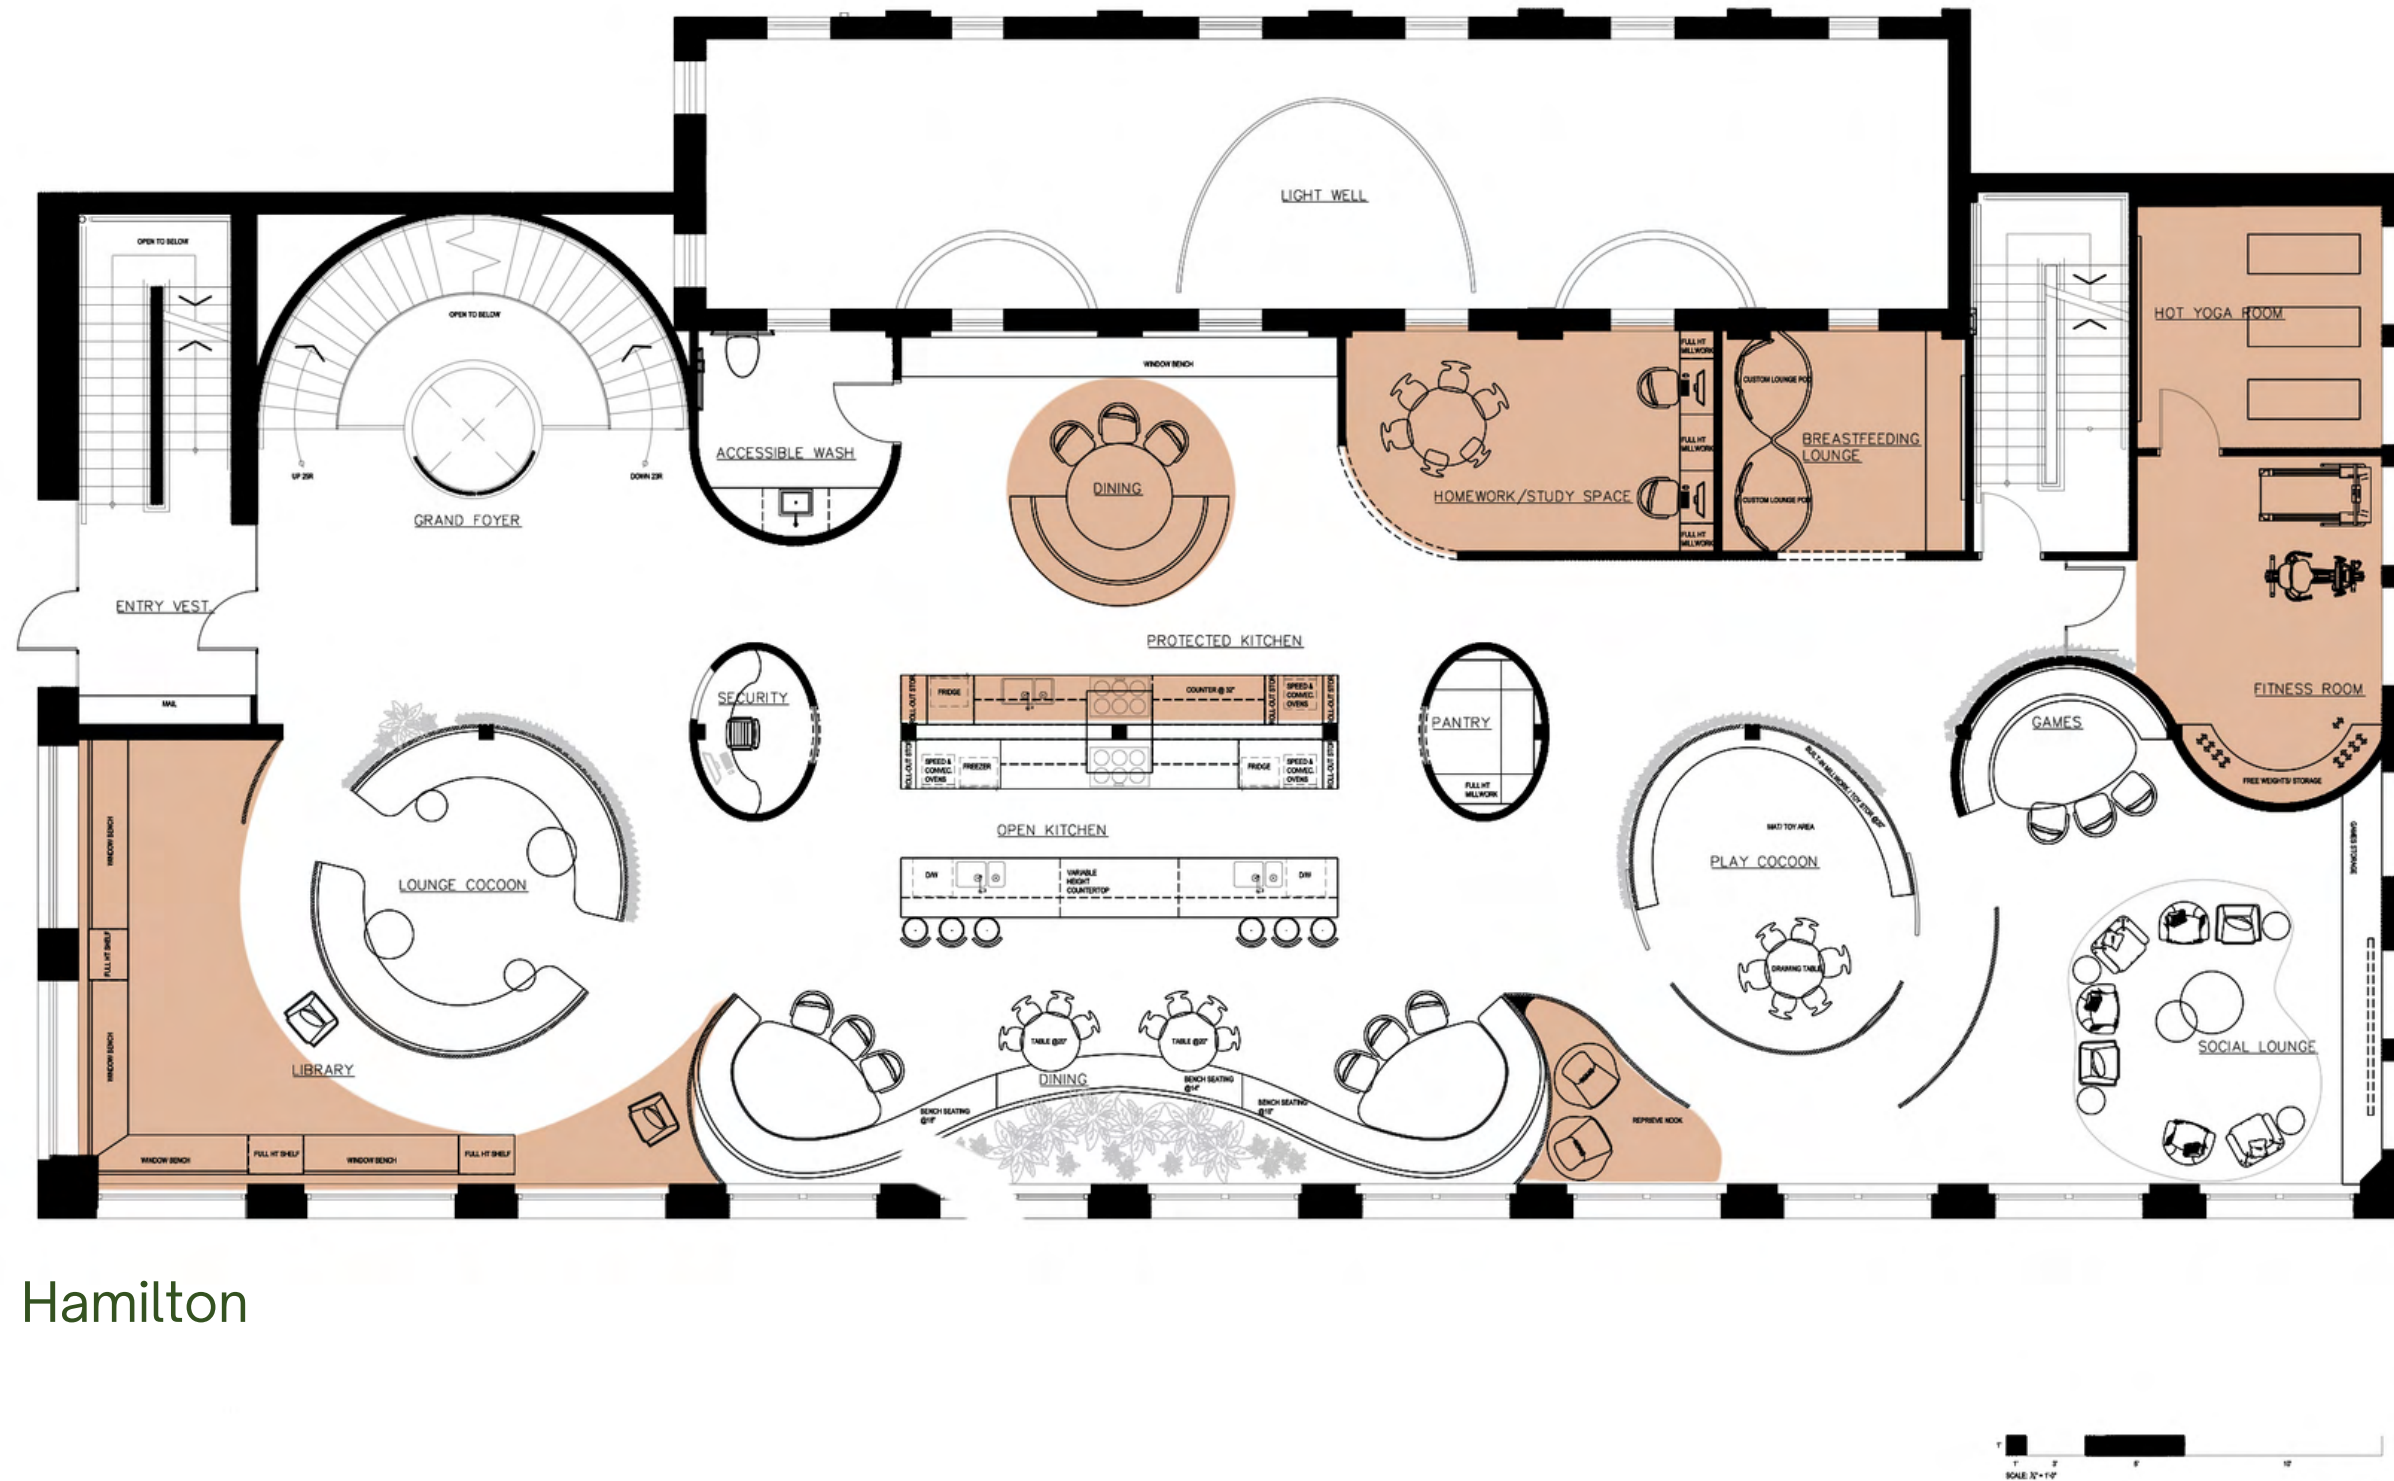

Hamilton

Light Well	
Ancillary	
Private Communal	
Social Communal	
Child Focused	

FIRST LEVEL | ZONING

Ancillary spaces include two fire stairs, a **security vestibule** and pod upon entry, a universally designed washroom, and a generous pantry

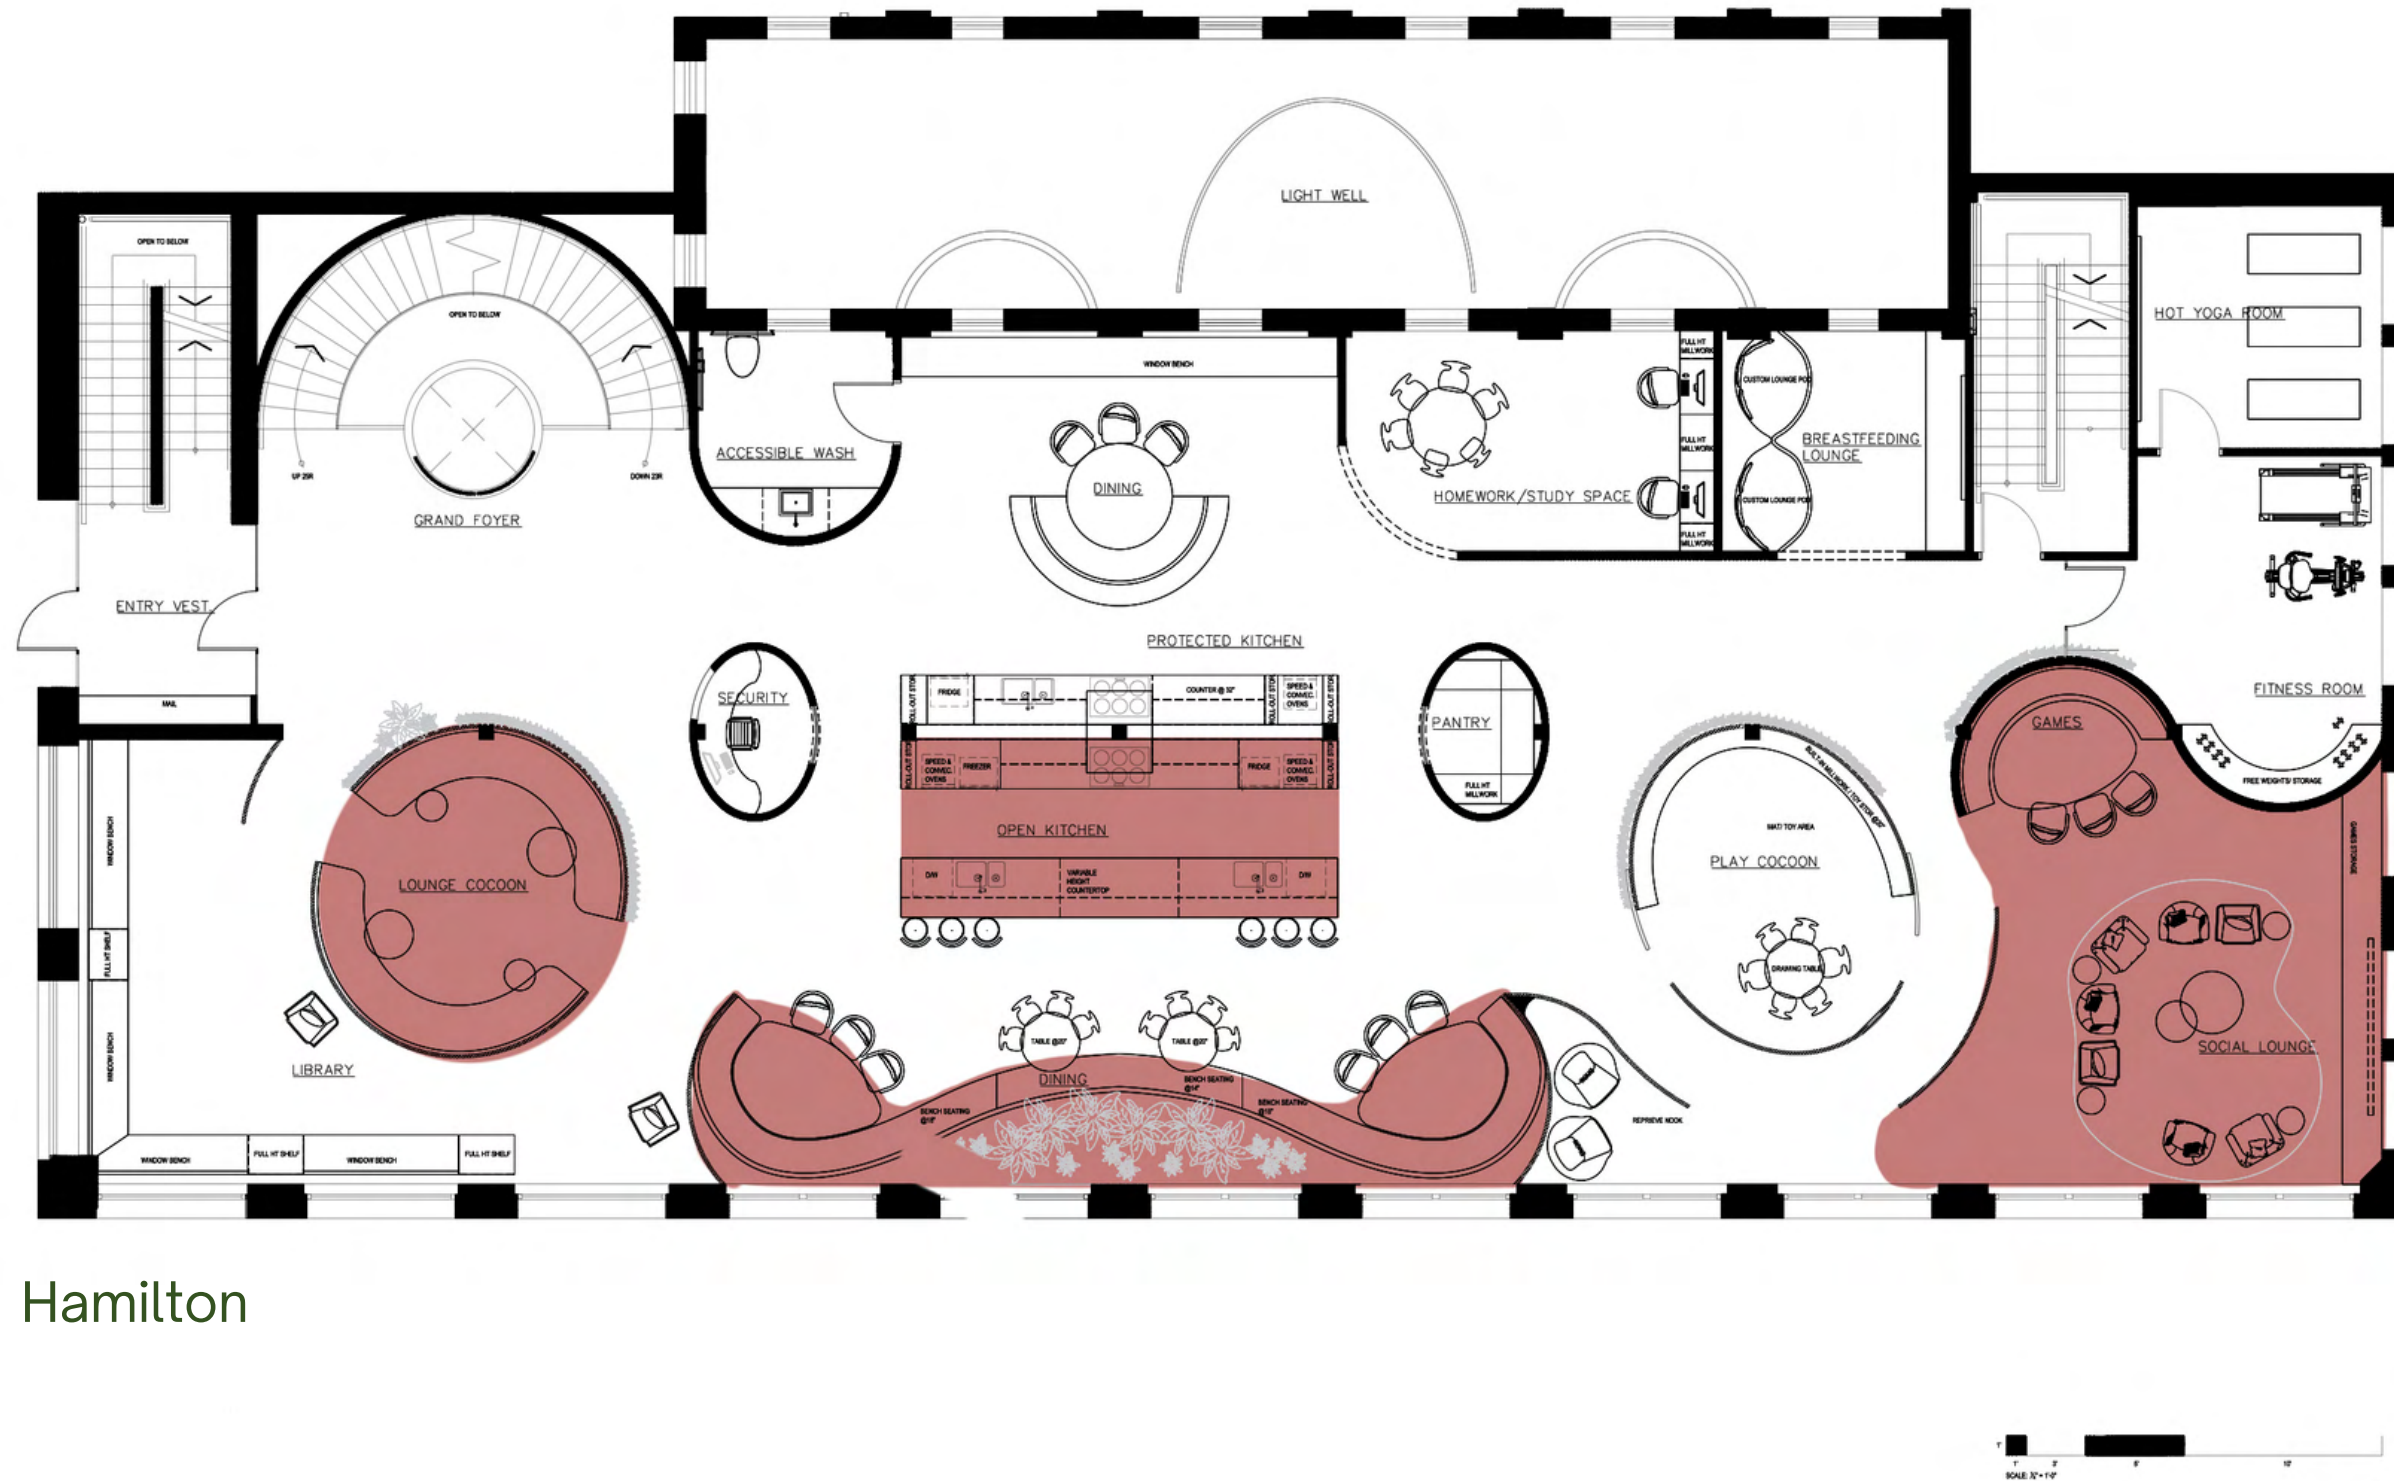

Light Well	
Ancillary	
Private Communal	
Social Communal	
Child Focused	

FIRST LEVEL | ZONING

Private communal spaces, such as a breastfeeding room, fitness area, library, and protected kitchen are shared by all but users are not expected to force interaction with others while enjoying them

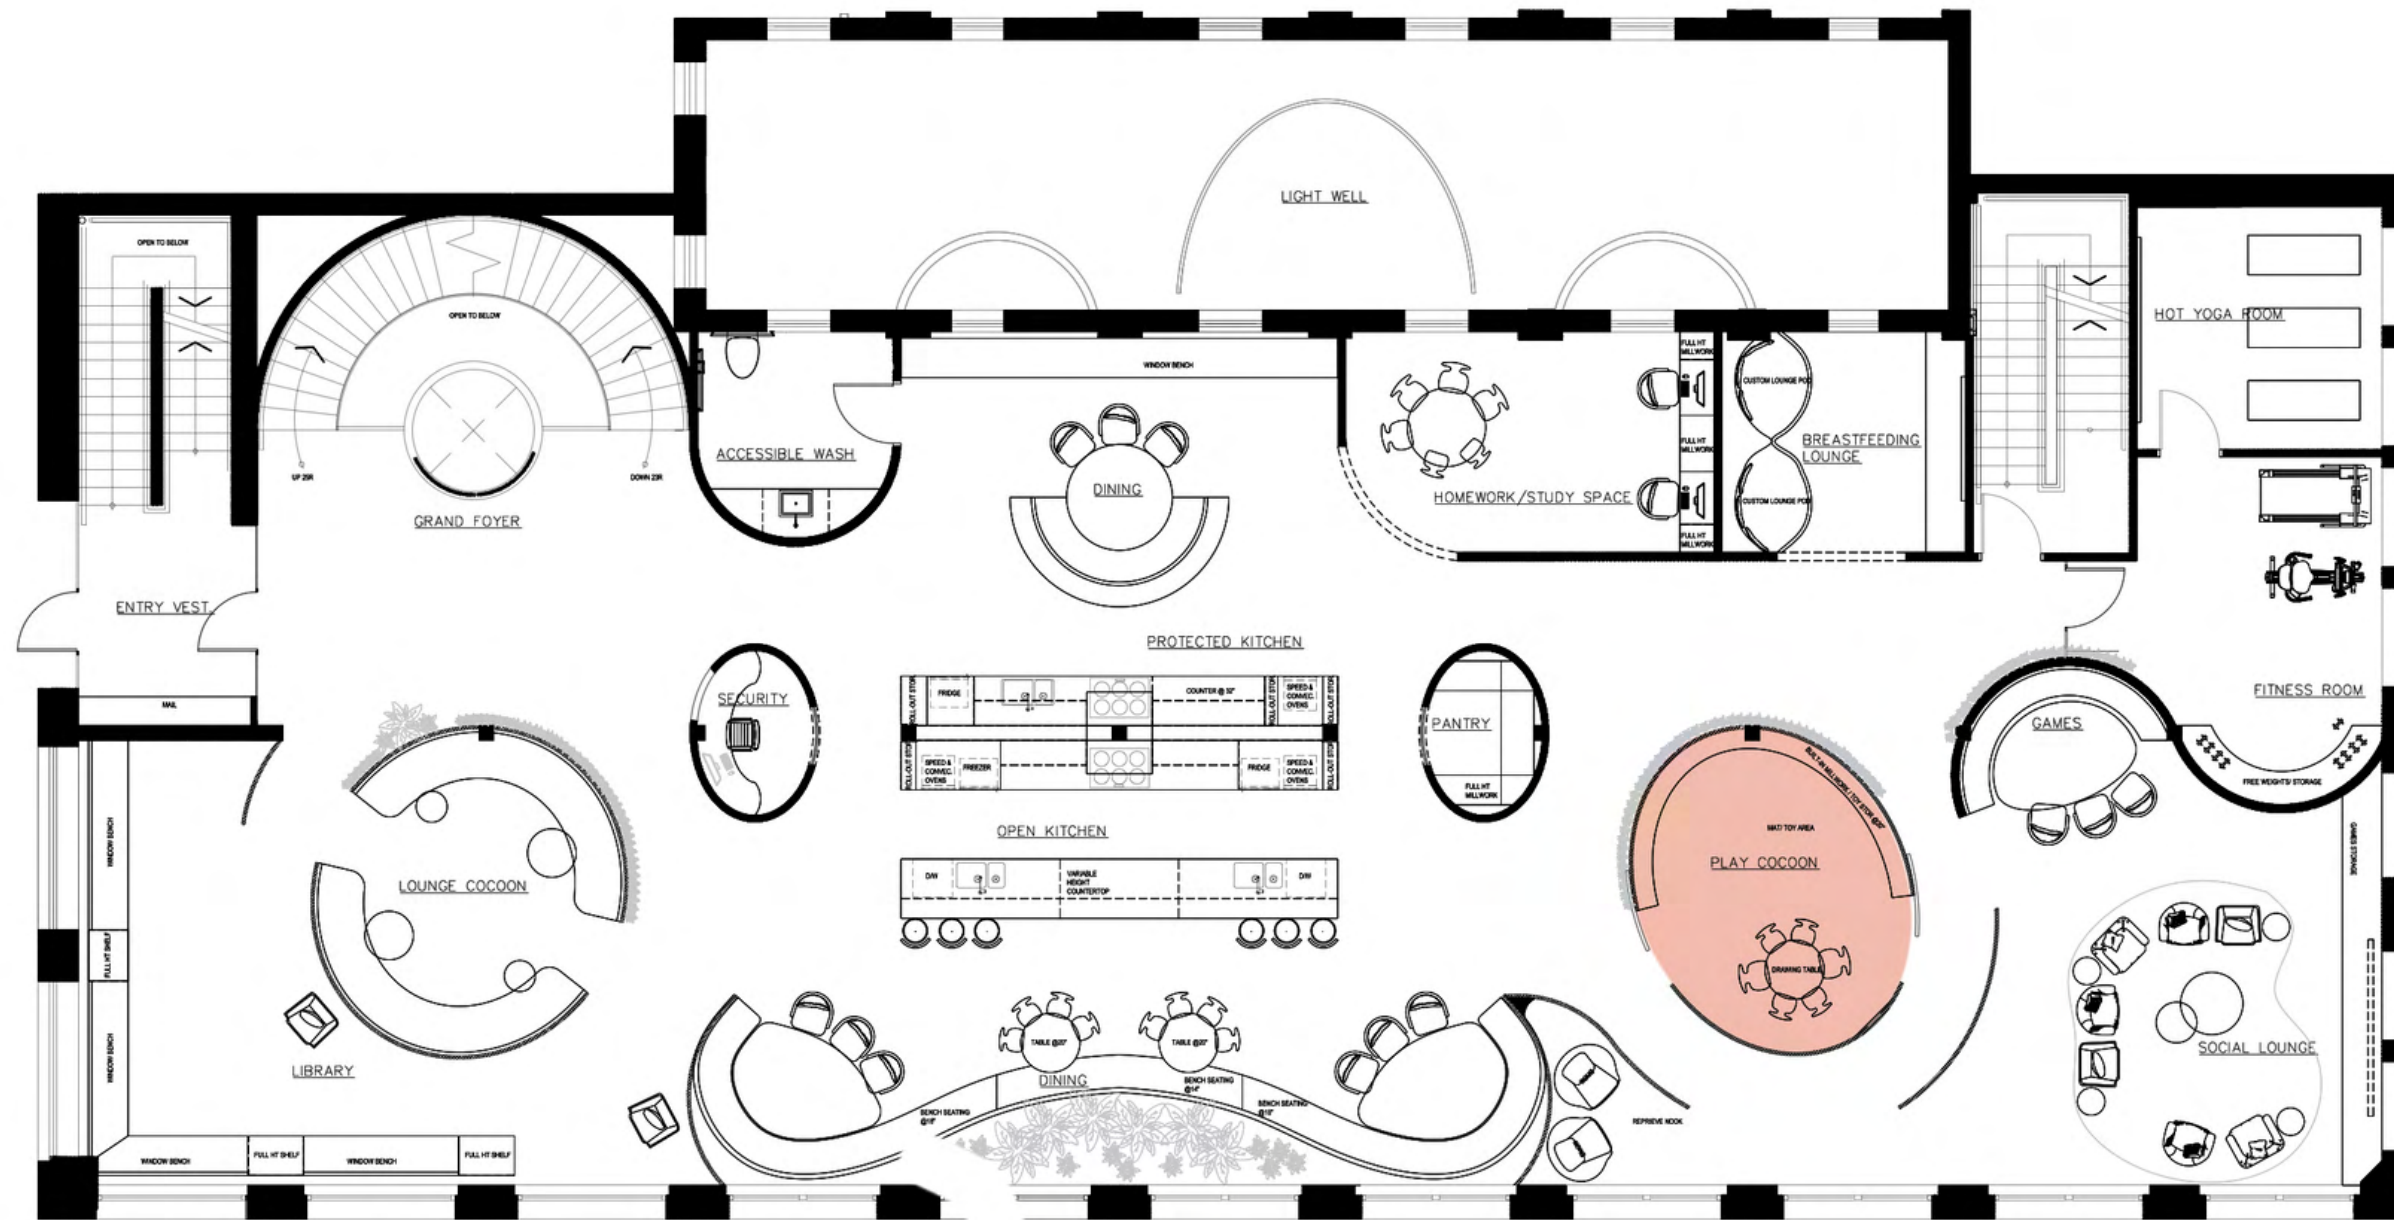

Hamilton

Light Well	
Ancillary	
Private Communal	
Social Communal	
Child Focused	

FIRST LEVEL | ZONING

Social spaces are the heart of the Atwood, with open and protected lounges, a large kitchen, and communal dining. These large and well-adorned community spaces are **meant to entice users out of their units.**

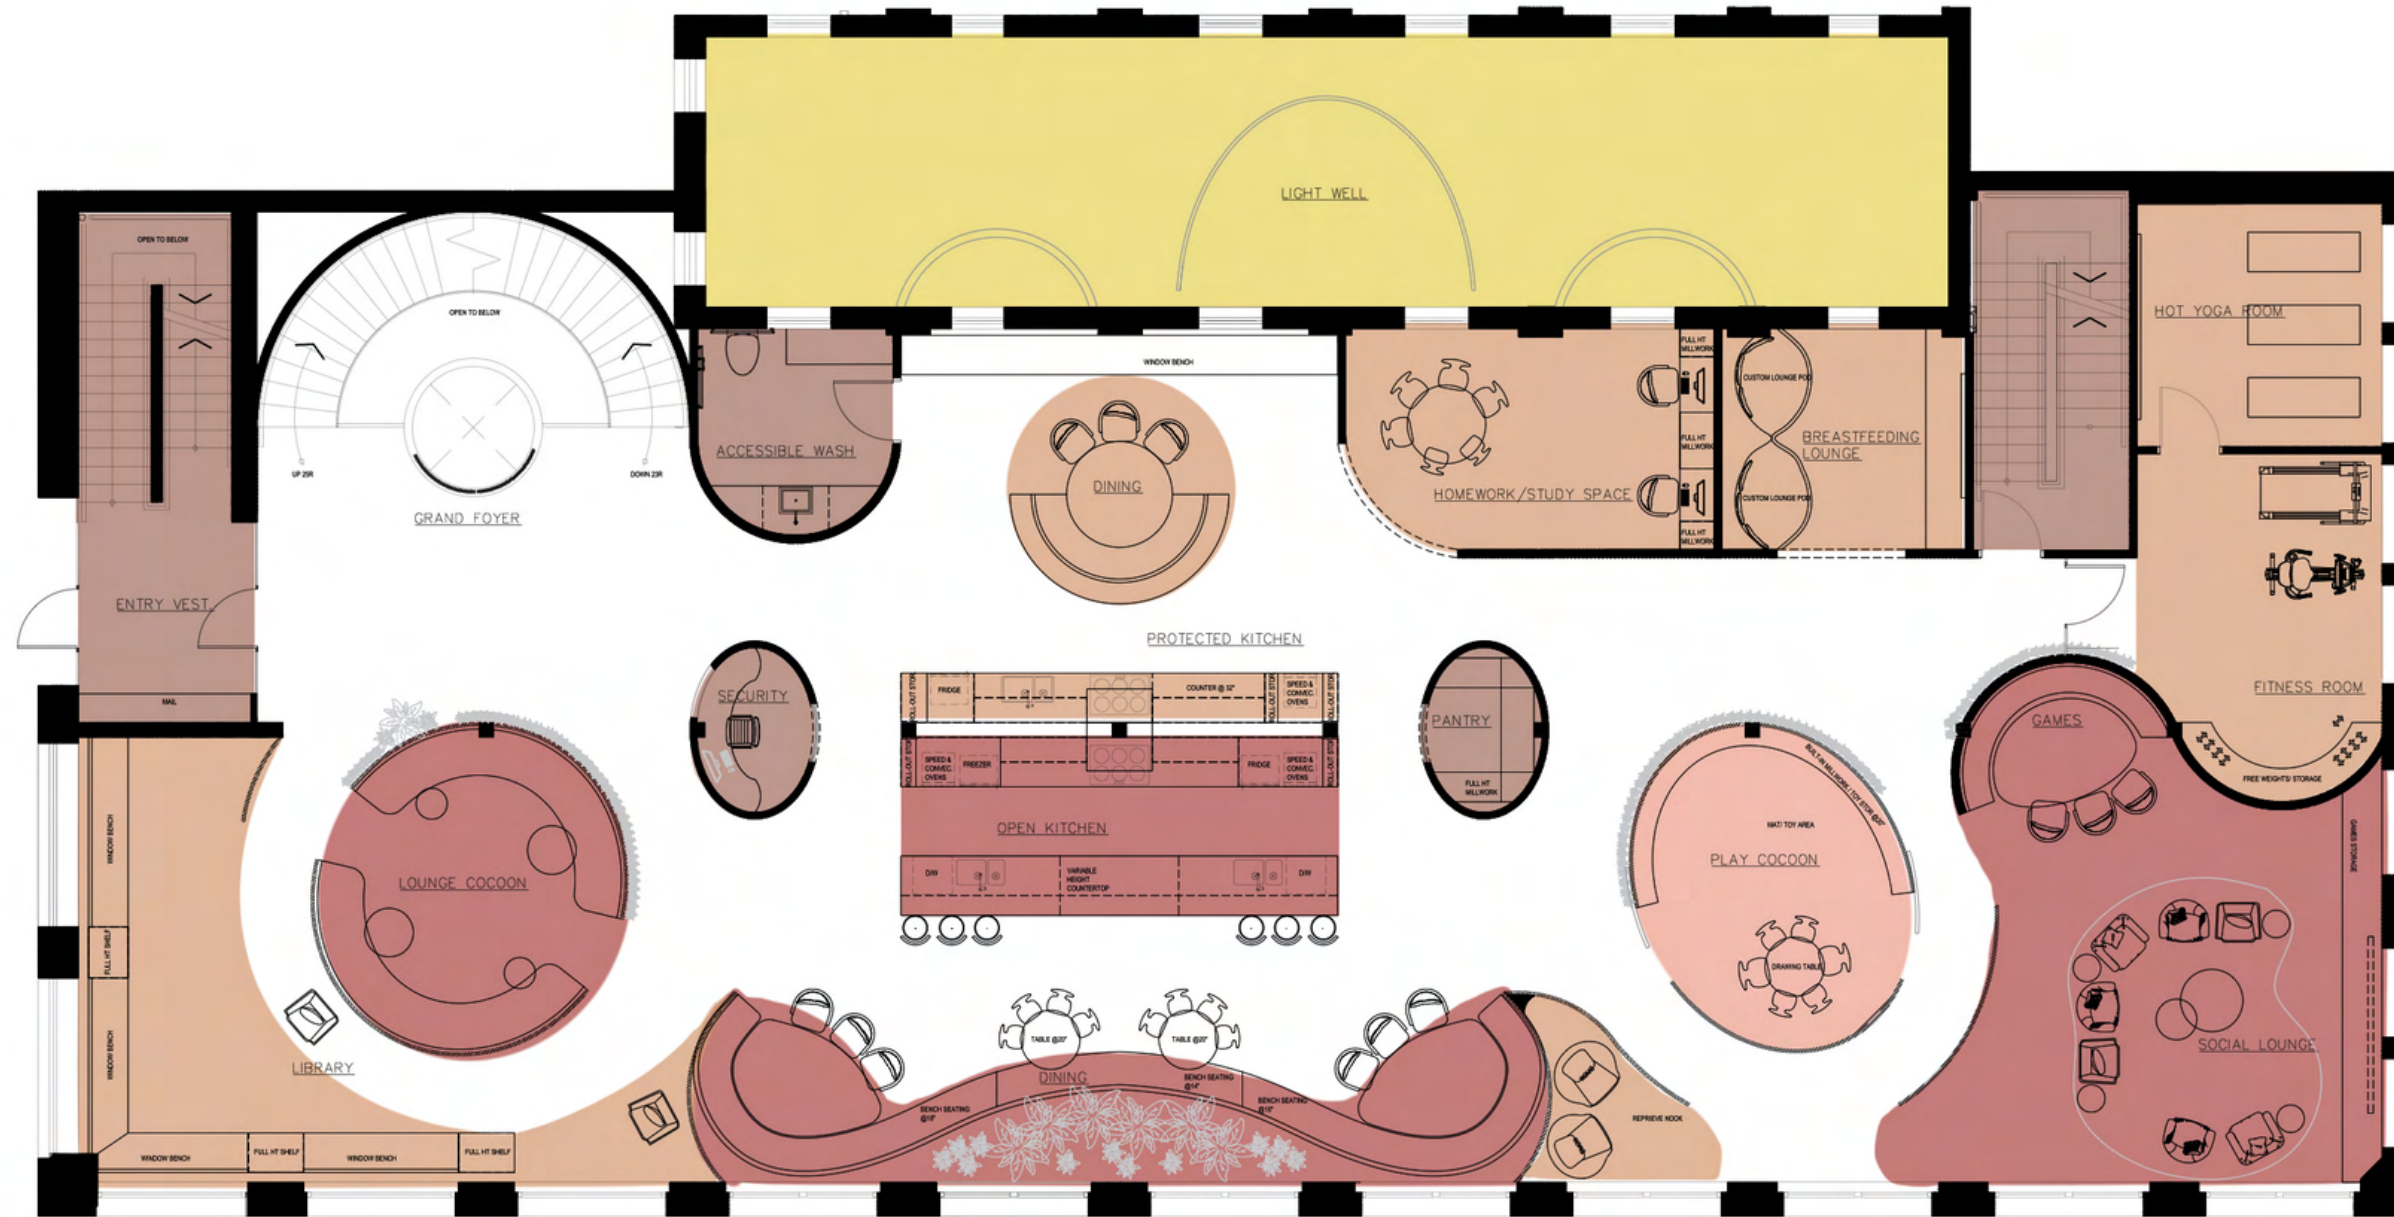

Hamilton

Light Well	
Ancillary	
Private Communal	
Social Communal	
Child Focused	

FIRST LEVEL | ZONING

A play cocoon is strategically placed within the sightlines of the kitchen, dining, lounge, and breastfeeding areas. The space can be closed off via Dutch doors and child-locks to prevent runoffs

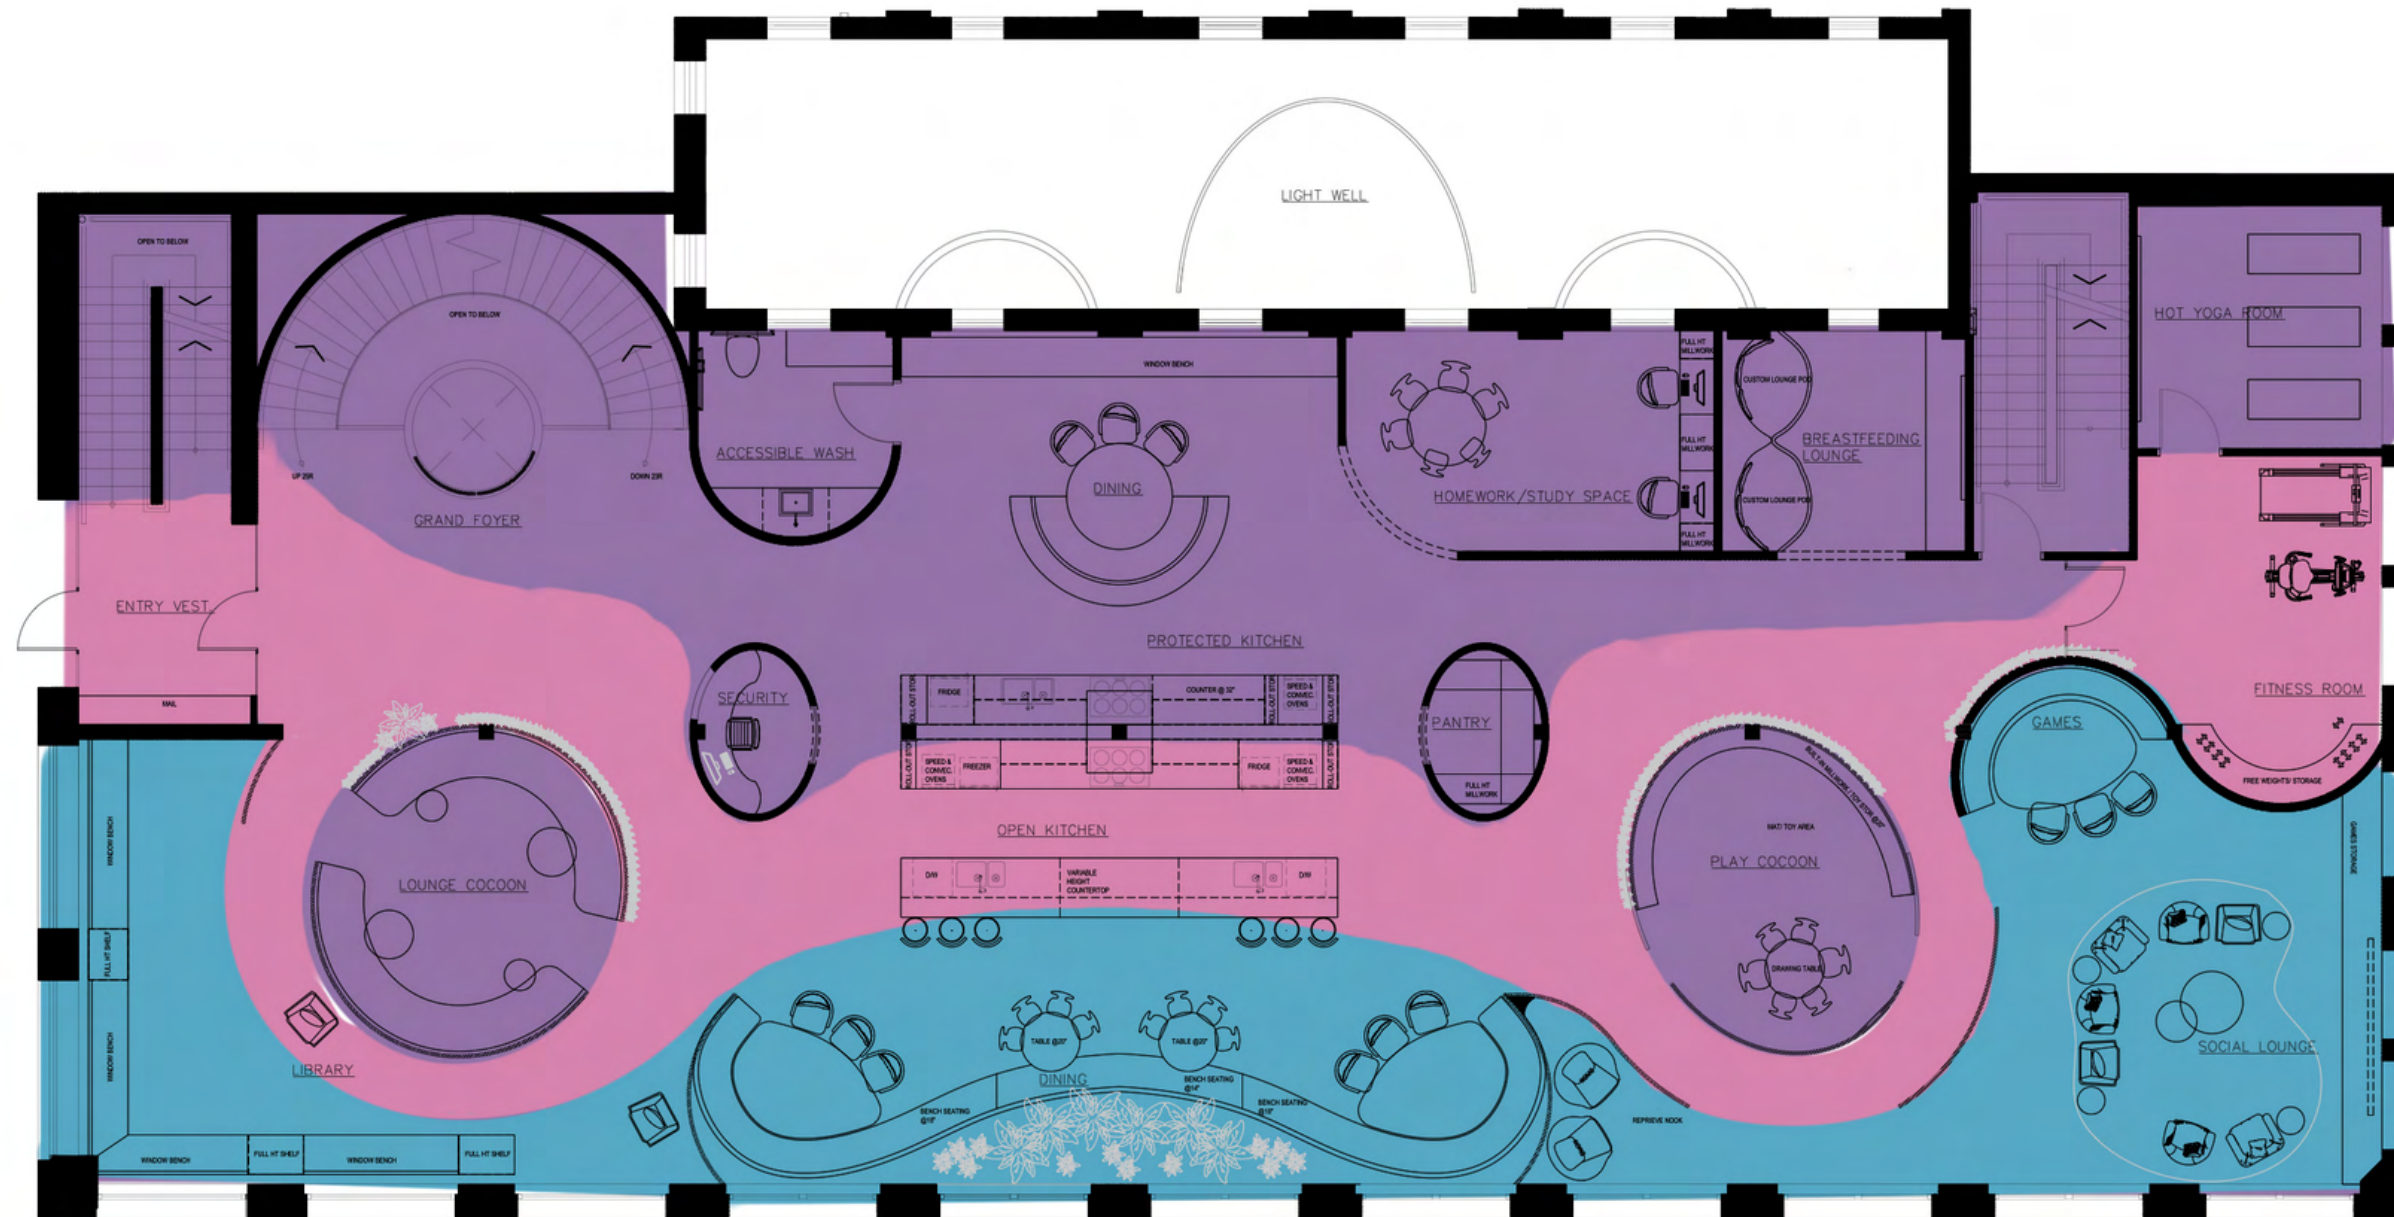

Hamilton
